World Class Feb 09 2022 How have school curricula been affected by the ripple effects of globalization? How do teachers and students attempt to understand their complex world? Most states require world teaching in some form, yet little is known about how teachers and students engage in this critical curricular area. World Class: Teaching and Learning in Global Times directly fills this need by providing a detailed, inside look at global education in three high schools. The data from the study, drawn from extensive interviews and observations, illustrate the daily challenges and complexities of global teaching and learning. Comprehensive yet scholarly, this volume: *raises thought-provoking questions for both theorists and practitioners; *addresses controversial issues embedded in global education and throughout the social studies curriculum, such as the tension between universalism and cultural relativism, the problematic nature of identity in classroom discourse, and the apparent duality of national and global loyalties; *connects issues particular to global education with wider scholarship in education; *examines the interplay of theory and practice in global education and, more broadly, the social sciences; and *provides an exploratory and provocative look at dimensions of global civics, with an analysis of the events of 9/11/01 and how they have shaped global perspectives about living as one planet. The book is organized in three parts--contexts, problems, and alternatives. Contexts allows readers to consider global education from multiple perspectives: teacher, student, administrator, community member, and scholar. Problems focuses on pedagogical challenges associated with global education. Alternatives provides reflection points that encourage readers to consider different ways we might converse about global teaching and learning. Written for scholars, practitioners, and students in social studies, curriculum and instruction, global/multicultural education, and related fields, World Class: Teaching and Learning in Global Times is an excellent text for preservice and graduate-level courses in these areas.

World Class Feb 21 2023 "An upbeat chronicle of [Clavel's] children's school experiences in Hong Kong, Shanghai, and Tokyo...[offering] advice about vetting schools and enriching children's education." —Kirkus Reviews "An intriguing volume on the differences in global education." —Library Journal A must-read firsthand exploration of why Asian students are outpacing their American counterparts and how to help our children excel in today's competitive world. When Teru Clavel had young children, she watched her friends and fellow parents vie for spots in elite New York City schools. Instead of losing herself in the intensive applications and interview process, Teru and her family moved to Asia, embarking on a decade-long journey through the public schools of Hong Kong, Shanghai, and Tokyo. These schools were low-tech and bare-bones, with teachers who demanded obedience and order. In Hong Kong, her children's school was nicknamed The Prison for its foreboding facilities, yet her three-year-old loved his teachers and his nightly homework. In Tokyo, the students were responsible for school chores, like preparing and serving school lunches. Yet Teru was amazed to discover that her children thrived in these academically competitive cultures; they learned to be independent, self-confident, resilient, and, above all, they developed a deep love of learning. When the family returned to the States, the true culture shock came when the top schools could no longer keep up with her children. Written with warmth and humor, World Class is a compelling story about how to inspire children to thrive academically. "Studded with lists of useful tips about choosing schools and hiring tutors, for parents who must advocate for their children and supplement gaps in their educations" (Publishers Weekly) and an insightful guide to set your children on a path towards lifelong success.

Chasing World-Class Urbanism Jun 20 2020 Questions increasingly dominant urban planning orthodoxies and whether they truly serve everyday city dwellers What makes some cities world class? Increasingly, that designation reflects the use of a toolkit of urban planning practices and policies that circulates around the globe. These strategies—establishing creative districts dedicated to technology and design, “greening” the streets, reinventing historic districts as tourist draws—were deployed to build a globally competitive Buenos Aires after its devastating 2001 economic crisis. In this richly drawn account, Jacob Lederman explores what those efforts teach us about fast-evolving changes in city planning practices and why so many local officials chase a nearly identical vision of world-class urbanism. Lederman explores the influence of Northern nongovernmental organizations and multilateral agencies on a prominent city of the global South. Using empirical data, keen observations, and interviews with people ranging from urban planners to street vendors he explores how transnational best practices actually affect the lives of city dwellers. His research also documents the forms of resistance enacted by everyday residents and the tendency of local institutions and social relations to undermine the top-down plans of officials. Most important, Lederman highlights the paradoxes of world-class urbanism: for instance, while the priorities identified by international agencies are expressed through nonmarket values such as sustainability, inclusion, and livability, local officials often use market-centric solutions to pursue them. Further, despite the progressive rhetoric used to describe urban planning goals, in most cases their result has been greater social, economic, and geographic stratification. *Chasing World-Class Urbanism* is a much-needed guide to the intersections of culture, ideology, and the realities of twenty-first-century life in a major Latin American city, one that illuminates the tension between technocratic aspirations and lived experience.
