Education and the Politics of Becoming May 14 2022 This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of Discourse: Studies in the Cultural Politics of Education.

A House to Remember Jan 10 2022 What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In A House To Remember, she explains why.

Modern Ideas in Chess Nov 15 2019 Modern Ideas in Chess is a series of 45 essays dealing with the evolution of game, its leading players, their ideas and contributions to their respective periods. The chronology starts in the Romantic era of Anders-sen and Morphy, continues through the Classical School of Steinitz, Tarrasch, Lasker, and runs to the dawn of the Hypermodern Revolution; the 70 year stretch from 1852 to 1922. Working in small chunks Rti had to be selective in what he extracted from each player and period. Plus the individual elements all had to tie in with the larger canvass Rti was painting for his readers. You dont have to get too far into the book to realize that Rti was a creative artist using the tension of chess ideas to reflect the larger intellectual struggle of mankind. How does Rti do it? A solid chess foundation obviously helps, also keen observation of the human experience coupled with a powerful command of language. Together these serve up indelible images that stick in the mind of the reader and lift this work far above the ordinary. Modern Ideas in Chess is one of the rare books that transcends the time frame in which it was written. It stands on its own, timeless, one of the true classics in the literature of the game.

The Future of the North American Free Trade Agreement Aug 05 2021 Twenty-three years ago, the North American Free Trade Agreement revolutionized trade and investment between the U.S., Canada, and Mexico. We share thousands of miles of border with Canada and Mexico. They are our neighbors and our natural partners in trade and security. America's strength is closely connected to its economic well-being. When we break down trade barriers, American trade and American jobs increase. Trade is the lifeblood of [the] State of Texas. Last year in Texas, almost 1 million jobs were supported by some form of trade. Texas has been the top exporting State in the United States for 14 consecutive years. The overwhelming majority of Texas exporters are not big corporations, but 93 percent of the Texas exporters are small and medium-size businesses. In my district of Houston, over half of the economy depends on trade. Houston has one of the largest ports in the world and is the oil and gas capital of the world. Mexico is Texas' number-one exporting partner. Over 10,000 trucks a day pass the Texas-Mexico border, all involved in trade. Texas is just one of the many States that rely on NAFTA to fuel the economy. Study after study have shown that increased trade leads to increased jobs for all Americans. More jobs mean more wealth for Americans. NAFTA supports 14 million jobs in the United States, and, thanks to NAFTA, trade between the U.S., Mexico, and Canada has tripled. Nearly every industry is affected in one way or another by NAFTA. The U.S. economy relies on NAFTA.
