Low's remarkable life, accomplishments, and legacy as a key visionary and leader. Book 2 of The Survivalist Series No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, Going Home, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to Going Home, Morgan knows that their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange new world--and they're starting to get restless. With the help of his closest companions, Morgan fights to keep his home secure--only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's One Second After, and The End by G. Michael Hopf will revel in A. American's apocalyptic tale. "A welcome tribute to the persistence, precision and humanity of Washington Roebling and a love-song for the mighty New York bridge he built." - The Wall Street Journal Chief Engineer is the first full biography of a crucial figure in the American story--Washington Roebling, builder of the Brooklyn Bridge. One of America's most iconic and recognizable structures, the Brooklyn Bridge is as much a part of New York as the Statue of Liberty or the Empire State Building. Yet its distinguished builder is too often forgotten--and his life is of interest far beyond his chosen field. It is the story of immigrants, the frontier, the Civil War, the making of the modern world, and a man whose life modeled courage in the face of extreme adversity. Chief Engineer is enriched by Roebling's own eloquent voice, unveiled in his recently discovered memoir, previously thought lost to history. The memoir reveals that his father, John--a renowned engineer who came to America after humble beginnings in Germany--was a tyrannical presence in Roebling's life. It also documents Roebling's time as a young man in the Union Army, where he built bridges to carry soldiers across rivers and fought in pivotal battles from Antietam to Gettysburg. He then married the remarkable Emily Warren Roebling, who played a crucial role in the construction of the Brooklyn Bridge, Roebling's grandest achievement--but by no means the only one. Elegantly written with a compelling narrative sweep, Chief Engineer introduces Washington Roebling and his era to a new generation of readers. Anxious to get into a Tokyo groove, both women are on the prowl for a funky and cheap place to live. But inexpensive apartments in Japan's capital city are hard to find. Thank goodness each Nana has a clique of cool friends willing to help out. Too bad these friends are a little wiggy! -- VIZ Media "SISTERS OF TREASON, the second novel by Elizabeth Fremantle, is a story of love, politics and tragedy. Beginning early in Mary Tudor's turbulent reign, SISTERS OF TREASON explores the lives of a pair of sisters as dangerously close to the throne as their sister Lady Jane Grey, who died on the executioner's block at the age of 16, after being queen for nine days. After Jane's death, Lady Catherine becomes the focus of plots to thwart Mary Stuart's claim on England's throne. Catherine is a young woman driven by a compulsive and ultimately fatal desire to love and be loved. Clever Lady Mary is burdened with a crooked spine and a tiny stature in an age when physical perfection equates to goodness and vice versa. Both girls have inherited the Tudor blood that is more curse than blessing. It is court painter Levina Teerlinc who helps the girls survive Mary's reign, but when the Queen's sister, the hot-headed Elizabeth, inherits the crown, the world at court becomes increasingly treacherous for the Grey girls. For either girl to marry without the queen's permission would be a potentially fatal political act, perceived as a treasonous grab for the throne, but Elizabeth is unlikely to let either girl ally herself and become an even more dangerous focus for her enemies. Each young woman must decide how far she will go to defy her queen and find the safety and love she longs for"-- Light symbolises the highest good, it enables all visual art, and today it lies at the heart of billion-dollar industries. The control of light

forms the foundation of contemporary vision. Digital Light brings together artists, curators, technologists and media archaeologists to study the historical evolution of digital light-based technologies. Digital Light provides a critical account of the capacities and limitations of contemporary digital light-based technologies and techniques by tracing their genealogies and comparing them with their predecessor media. As digital light remediates multiple historical forms (photography, print, film, video, projection, paint), the collection draws from all of these histories, connecting them to the digital present and placing them in dialogue with one another. Light is at once universal and deeply historical. The invention of mechanical media (including photography and cinematography) allied with changing print technologies (half-tone, lithography) helped structure the emerging electronic media of television and video, which in turn shaped the bitmap processing and raster display of digital visual media. Digital light is, as Stephen Jones points out in his contribution, an oxymoron: light is photons, particulate and discrete, and therefore always digital. But photons are also waveforms, subject to manipulation in myriad ways. From Fourier transforms to chip design, colour management to the translation of vector graphics into arithmetic displays, light is constantly disciplined to human purposes. In the form of fibre optics, light is now the infrastructure of all our media; in urban plazas and handheld devices, screens have become ubiquitous, and also standardised. This collection addresses how this occurred, what it means, and how artists, curators and engineers confront and challenge the constraints of increasingly normalised digital visual media. While various art pieces and other content are considered throughout the collection, the focus is specifically on what such pieces suggest about the intersection of technique and technology. Including accounts by prominent artists and professionals, the collection emphasises the centrality of use and experimentation in the shaping of technological platforms. Indeed, a recurring theme is how techniques of previous media become technologies, inscribed in both digital software and hardware. Contributions include considerations of image-oriented software and file formats; screen technologies; projection and urban screen surfaces; histories of computer graphics, 2D and 3D image editing software, photography and cinematic art; and transformations of light-based art resulting from the distributed architectures of the internet and the logic of the database. Digital Light brings together high profile figures in diverse but increasingly convergent fields, from academy award-winner and co-founder of Pixar, Alvy Ray Smith to feminist philosopher Cathryn Vasseleu. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant. Accompanying 124 photographs by C.R. Nicewonger, the text explains and describes the significance of musical instruments in Medieval English church carvings. In addition, a listing of every carving known to the authors is included. Annotation copyrighted by Book News, Inc., Portland, OR This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales. Serious, Moving, Funny And Ironic By Turns, These Stories Are Replete With The Perceptions Of A Man Who Has Viewed The World With Equanimity And Compassion. Produces evidence to corroborate reports in July 1947 that a flying saucer crashed at Roswell, New Mexico Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular Parts and More Parts. DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times. The composer's music can be typified as "modern" in craft, but American in character. Shere (a composer and critic) examines Erickson's work within both of these contexts and in a way that is accessible to non-musicians. The biography traces the composer's childhood influences; his studies with Austrian modernist Ernst Krenk; his depression and war years; the early teaching career, and his role as a pioneer of experimental music at the San Francisco Conservatory and the University of California, San Diego. A CD of three of Erickson's works is included with the text, and a list of works by title. Althea James is the girl everyone loves to ignore. Even her parents act like she doesn't exist, especially after her perfect sister, Caroline, arrives home from college for summer break. But the sibling rivalry Althea shares with Caroline goes much deeper than competing for their parents' affection. Caroline represents everything Althea isn't and never will be. Until one tragic night that threatens to change her life forever. Suddenly, Althea is forced into the blinding spotlight of fame, but for all the wrong reasons. Her sister is dead, her boyfriend is in jail, and her parents have reported her missing. Now, caught in the middle of the media storm, Althea is the girl no one can stop talking about. But is her newfound fame worth the secret she so desperately wants to keep? In Japan, it is well-known that there are mysterious documents that may be related to modern UFO phenomena. It is certain that they were written about two hundred years ago, long before 1947 (when the first UFO sighting was recorded). These documents state the details of an incident that occurred on a Japanese beach in 1803 and the description provided resembles modern UFO close encounters of the third kind. In most of the documents, a disk-shaped ship called Utsuro-bune (UFO?), a strange woman speaking an unknown language (alien?) and strange characters (alien hieroglyphs?) are depicted. At present, a total of twelve documents detailing the same incident have been found which is an indicator of the validity of the incident, given the high number. If the UFO-like craft described in the documents based on actual observations of UFOs in Japan two hundred years ago is verified, the documents can be considered as strong evidence of the existence of UFOs. From the viewpoint of folklore, the incident has been considered as part of the legends of Utsuro-bune (hollow ship in English) for a long time; these legends have been passed down in Japan, and Utsuro-bune is a ship based on the human imagination. However, following the arrival of UFO fever from the USA in 1947, a mystery emerged around how the disk-shaped ship depicted in the documents resembles a UFO to such an extent. Can it be considered the long-awaited hard evidence of the existence of UFOs? This intriguing story has been known as the Utsuro-bune UFO legend in Japan. The purpose of this book is to document an exhaustive study of this Utsuro-bune UFO legend from scientific, historical, and folkloric viewpoints. How did the Japanese author of the documents in the Edo Period, which was two hundred years ago, imagine UFO-like shapes when the visual characteristics of a modern UFO could not possibly have been known at that time? Were the pictures of the Utsuro-bune UFO drawn based on an actual UFO sighting dating back to the Edo Period? This book will be the first, the only, and the most complete documentation of this mystery; it is available in English and employs principles of both science and reason. The reader will be fascinated by the bizarre circumstances of this mystery which can be summarized by the following question: "Why are ships similar to UFOs depicted in the ancient literature of the Edo Period, which took place two hundred years ago, in Japan? The story of the vampire has much more deeper meaning than the normal neck biting we read or see on TV. The Dracula character wheeled today is a most incredible creation. Yet, there is a much darker side, most especially when the Vamp assumes her full role. This volume is a short look into a much wider view of the vamp and the vampire nature. We will dive into the spiritual, metaphysical and scientific aspect. Therefore, presenting a different spin on how vampires are born physically and spiritually. The story starts off with Sirius Diggs doing research on how to produce a living skin cell to cover the outside of a spaceship. He encounters a female vampire who has been raised from the ethers to renew her feminist spirit. She helps Sirius unlock his soul and harness the power of the vampire by feeding on the weak and pondering the nature of evil. Charles manly uses the towns people as guinea pigs, killing at will and manipulating every situation. He will stop at nothing to destroy the vamp and bleed Sirius at the same time. A techno-thriller novel of the near future when a powerful Artificial Intelligence called Oracle identifies individuals who pose a significant risk to the stability of our society, or who have a high probability of posing such a risk in the future, and sends assassins to kill them. Oracle knows each of us so well, better than we know ourselves, that it is able to determine who might become the next Hitler or Stalin long before that person even has an inkling of such a future. The main character is Henry Porembski, who becomes one of Oracle's assassins when he is recruited after his wife and daughter are killed in a terrorist attack. When he is sent to kill a young girl, the same age as his daughter, he turns against Oracle and vows to protect the girl. He wonders, though: if Oracle knows us so well, why would it send him to kill a girl it had to know he would not kill? And could it really predict how a little girl would turn out as an adult? It all comes to a tense conclusion after Henry learns that his mission to kill the girl was really to set in motion a series of events intended to bring about the downfall of Oracle...because Oracle has determined that it, itself, poses a threat to the human civilization, and needs to be eliminated. This follow-up volume to the same editors' highly-acclaimed New Labour in Government provides a systematic assessment of Blair's first term and the continuities and changes into his second. Bringing together specially-commissioned chapters by leading authorities in a tightly-edited format, it places particular emphasis on the evolution of New Labour's political performance, policy and statecraft set in its historical, ideological and organizational context. Though Kant never used the word 'emotion' in his writings, it is of vital significance to understanding his philosophy. This book offers a captivating argument for reading Kant considering the importance of emotion, taking into account its many manifestations in his work including affect and passion. Emotion, Reason, and Action in Kant explores how, in Kant's world view, our actions are informed, contextualized and dependent on the tension between emotion and reason. On the one hand, there are positive moral emotions that can and should be cultivated. On the other hand, affects and passions are considered illnesses of the mind, in that they lead to the weakness of the will, in the case of affects, and evil, in the case of passions. Seeing the role of these emotions enriches our understanding of Kant's moral theory. Exploring the full range of negative and positive emotions in Kant's work, including anger, compassion and sympathy, as well as moral feeling, Borges shows how Kant's theory of emotion includes both physiological and cognitive aspects. This is an important new contribution to Kant Studies, suitable for students of Kant, ethics, and moral psychology. THE HIDDEN HISTORY OF UFOs People have always been fascinated by lights in the sky. Early astronomers and astrologers, medieval pamphleteers, scientists, navigators, and weather observers, all recorded sightings of strange phenomena. The question is: Were these the same as our modern UFOs? The authors of Return to Magonia have taken a serious, critical look at some of those sightings. Using modern resources and tools, they dissect more than 20 fascinating cases from the last 500 years, showing that reality can be more interesting than any popular catch-all theory. They discover that UFOs in history are as intriguing, as entertaining, and often as baffling as they are today. In this unique and challenging book you will read about: the flat "plate" seen over a 17th-century Swedish city, leaving witnesses stricken with an unknown sickness; a fiery object that landed beside a road in Ohio, piloted by a mysterious man in black; a weird blue ball of fire that devastated a British navy ship; the Minnesota doctor who saw a disk of "electric" light floating across the fields; and a formation of locomotive-sized "eggs" that descended on an Australian town shortly after World War II. Combining science, history, and a broad knowledge of the UFO field, Martin Shough and Chris Aubeck set a new standard for UFO research and shed light on one of the oldest recorded mysteries in human experience. CHRIS AUBECK is the founder of the historical research group Magonia Exchange, an international archival project, and the co-author (with Jacques Vallee) of Wonders in the Sky. MARTIN SHOUGH is a Research Associate for National Aviation Reporting Center on Anomalous Phenomena (NARCAP)." Cover Design and illustrations by Tiffany Nevills The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era.
