DiAP nel mondo | DiAP in the world - International Vision | Visioni internazionali Jan 26 2023 International openness is one of the fundamental characteristics of the DiAP Department of Architecture and Design, which sees its members active in 57 bilateral collaboration agreements (without counting the Erasmus agreements) with countries in which today there is a demand for architectural design that looks at Italy as a model, not only for studies of historical architecture, but also for contemporary architecture designed in the existing city and for the new building, including complex landscape and environmental systems.

Lettera (e non solo) Mar 16 2022 Questo è un libro destinato agli studenti di architettura, a tutti coloro che scelgono di provare ad imparare il difficile mestiere di architetto. Non è un insieme di saggi, né la trascrizione di lezioni di architettura. I saggi o i testi scientifici sono sempre scritti con un linguaggio asettico e sono pensati secondo modalità comunicative che spesso risultano distaccate, se non addirittura noiose. Non sono neanche lezioni di architettura che invece devono essere "in diretta", adeguarsi agli uditori, al momento, alla temperatura che c'è in aula, come al rumore di fondo di chi borbotta annoiato. Allora cos'è? E' un libro scritto come frammenti o appunti di lettere, da un io che scrive a un tu che legge. È quindi un testo concepito come una conversazione con un vero interlocutore, "uno studente di architettura", in una condizione non formale

in cui parlare liberamente, fuori dalle aule, mescolando il personale con il soggettivo, gli studi con i sogni, le memorie con le cose perdute per strada, in una condizione spontanea in cui riuscire a dire la propria verità.

Ardeth #09 Nov 24 2022 Architecture is an inward looking discipline. Its history conveys the norms of the discipline to an audience composed mostly of architects, who are familiar with the work of their predecessors-from whom they learnt, or for whom they worked. As such, architecture singularises the multiple processes through which space is produced, excluding difference in the pursuit of coherent narratives to sustain its authority, and does so mainly through the figure of the architect. For a long time now, critics have shown how that figure is principally male. However, little has been said about the fact that the figure of the architect is also white; a racial classification that refers not only to epidermal characteristics, but to their national origin, education, and in most cases their class affiliation.

Un altro utente di YouTube - "moonwalker1966delta" - sta facendo lo stesso sin dal gennaio 2008, in qualit di dichiarato Comandante di Apollo 19. "retiredafb" asserisce d'essere William Rutledge, gi un civile pilota collaudatore impiegato dall'Aeronautica Militare degli Stati Uniti (l'USAF) prima di prendere parte all'Apollo 20 nel ruolo di Comandante, nell'agosto 1976. Apollo 20 ed Apollo 19 sarebbero state due segretissime missioni spaziali militari congiunte, USA-URSS, che avrebbero avuto come obbiettivo un allunaggio sul lato lontano della Luna, per investigare alcune anomalie lunari. La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità. Ediz. Italiana E Inglese Nov 12 2021

This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.

The Tradition of the Actor-author in Italian Theatre Apr 05 2021 "The central importance of the actor-author is a distinctive feature of Italian theatrical life, in all its eclectic range of regional cultures and artistic traditions. The fascination of the figure is that he or she stands on both sides of one of theatre's most important power relationships: between the exhilarating freedom of performance and the austere restriction of authorship and the written text. This broad-ranging volume brings together critical essays on the role of the actor-author, spanning the period from the Renaissance to the present. Starting with Castiglione, Ruzante and the commedia dell'arte, and surveying the works of Dario Fo, De Filippo and Bene, among others, the contributors cast light on a tradition which continues into Neapolitan and Sicilian theatre today, and in Italy's currently fashionable 'narrative theatre', where the actor-author is centre stage in a solo performance."

Συναγωνίζεσθαι: Studies in Honour of Guido Avezù. Vol. 1.1 May 06 2021 Συναγωνίζεσθαι, the ancient Greek verb chosen as the title of this volume, belongs to the jargon of dramaturgy as employed by Aristotle in *Poetics*, where he emphasizes the function of the Chorus as an active co-protagonist in the dynamics of drama. Here it suggests the collaborative nature of this *Festschrift* offered to Guido Avezù in the year of his retirement by friends and colleagues. The volume collects a wide selection of contributions by international scholars, grouped into four sections: Greek Tragedy (Part 1), Greek Comedy (Part 2), Reception (Part 3), and Theatre and Beyond (Part 4).

Paideia: The World of the Second Sophistic Aug 09 2021 In the World of the Second Sophistic, education, *paideia*, was a crucial factor in the discourse of power. Knowledge in the fields of medicine, history, philosophy, and poetry joined with rhetorical brilliance and a presentable manner became the outward appearance of the elite of the Eastern Roman Empire. This outward appearance guaranteed a high social status as well as political and economical power for the individual and major advantages for their hometowns in interpolis competition. Since *paideia* was related particularly to Classical Greek antiquity, it was, at the same time, fundamental to the new self-confidence of the Greek East. This book presents, for the first time, studies from a broad range of disciplines on various fields of life and on different media, in which this ideology became manifest. These contributions show that the Sophists and their texts were only the most prominent exponents of a system of thoughts and values structuring the life of the elite in general.

La città medievale è la città dei frati? / Is the medieval town the city of the friars? Apr 17 2022

Fin dalla metà del XIII secolo la presenza degli Ordini mendicanti diventa elemento caratterizzante della città medievale. Questo fenomeno sempre più esteso, che si consolida progressivamente nei decenni seguenti, raggiungendo l'apice nel corso del Trecento, provoca un acceso dibattito all'interno delle comunità conventuali sull'opportunità o meno di erigere complessi duraturi e monumentali nei contesti urbani. La successiva costruzione di una rilevante moltitudine di conventi nella penisola italiana incide profondamente sulle scelte artistiche e architettoniche con soluzioni innovative che verranno replicate, con opportune declinazioni locali, in un ampio contesto territoriale. La crescita della città europea tra XIII e XIV secolo risentirà profondamente della presenza dei conventi mendicanti, determinando l'espansione di alcune aree, l'incremento residenziale e demografico in altre, la trasformazione del tessuto storico prossimo ai principali poli urbani, religiosi e politici. Questo volume, esito del progetto di ricerca interdisciplinare e internazionale, *La città medievale. La città dei frati | Medieval city. City of the friars*, sostenuto da diversi enti e istituzioni, prospetta molteplici approcci e competenze utili a far luce sulla complessità e la ricchezza di una delle più significative esperienze religiose dell'età medievale e della prima età moderna.

Ardeth #01 (I - 2017) Apr 24 2020 Unlike the many magazines that revolve around the architectural world, Ardeth concerns neither with outcomes (architecture) nor with the authors (architects). Ardeth concerns instead with their operational work, i.e. projects. The shift from subjects (their good intentions, as taught in Universities and reclaimed in the profession) to objects (the products of design, at work within the social system that contains them) engenders an analytical and falsifiable elaboration of the complex mechanisms that an open practice such as design involves. Through a process of disciplinary redefinition, Ardeth explores the falsifiability of design hypotheses as the object that allows the project to scientifically confront errors and approximations.

The Conservation and Presentation of Mosaics: At What Cost? Sep 29 2020 In recent years, funding for the conservation of cultural heritage has become increasingly difficult to obtain, and this trend shows no sign of changing significantly in the foreseeable future. The twelfth triennial meeting of the International Committee for the Conservation of Mosaics, held in Sardinia in October 2014, focused on the theme of cost, broadly considered, relating specifically to the preservation and presentation of the world's mosaic heritage. This handsome, abundantly illustrated volume provides a comprehensive record of the conference. The volume's sixty-seven papers and posters, comprising contributions from more than one hundred leading experts in the field, reflect the conference's principal themes: cost, methods of survey and documentation, conservation and management, education and training, backing materials and techniques, presentation and display, and case studies. Papers are presented either in English, French, or Italian; there are abstracts in English and either French or Italian for all entries. The volume will be of interest to conservators, site managers, and others responsible for conserving the mosaic heritage, especially in these challenging times.

Reconstructing Theatre Architecture Jun 19 2022 The study is aimed at reconstructing the historical process at the base of any significant theatre architecture. The modern space for the show is no longer intended as a direct derivation from classical types, but as a product of the transformation of the urban fabric in our cities. The research was conducted at the academies, state and municipal historical archives of numerous towns, in particular Rome, Milan, Mantua, Ferrara, Venice, London and Prague. All images are original. The work also includes the list of about 700 major Italian historical theatres.

Gravity: Where Do We Stand? Nov 19 2019 This book presents an overview of the current understanding of gravitation, with a focus on the

current efforts to test its theory, especially general relativity. It shows how the quest for a deeper theory, which would possibly incorporate gravity in the quantum realm, is more than ever an open field. The majority of the contributions deals with the manifold facets of “experimental gravitation”, but the book goes beyond this and covers a broad range of subjects from the foundations of gravitational theories to astrophysics and cosmology. The book is divided into three parts. The first part deals with foundations and Solar System tests. An introductory pedagogical chapter reviews first Newtonian gravitational theory, special relativity, the equivalence principle and the basics of general relativity. Then it focuses on approximation methods, mainly the post-Newtonian formalism and the relaxed Einstein equations, with a discussion on how they are used in treating experimental tests and in the problem of generation and detection of gravitational waves. Following this is a set of chapters describing the most recent experiments, techniques and observations on the testing of gravity theories in the laboratory, around the Earth and in the Solar System. The second part is dedicated to astrophysical topics deeply linked with the study of gravitation, namely binary pulsars and the perspective of direct detection of gravitational waves. These cases are paradigmatic in that the gravitational signals act at the same time as messengers helping us to understand the properties of important and wide classes of astrophysical objects. The third part explores the many open issues in current knowledge of gravitation machinery, especially related to astrophysical and cosmological problems and the way possible solutions to them impact the quest for a quantum theory of gravitation and unified theory. Included is a selection of the many possible paths, giving a hint to the subtleties one is called upon. Whenever possible, a close link to observational constraints and possible experimental tests is provided. In selecting the topics of the various contributions, particular care has been devoted to ensure their fit in a coherent representation of our understanding of gravitational phenomena. The book is aimed at graduate level students and will form a valuable reference for those working in the field.

Ardeth #02 (I - Spring 2018) Mar 04 2021 In the last fifteen years we witnessed a new ethnographic wave of studies that focused on practising architecture. This body of research aimed at grasping the socio-material dimension of architectural practice. They all relied on the assumption that architecture is collective but it is shared with a variety of nonhumans. These “new ethnographies” generated “thick descriptions” of the knowledge practices of different participants in design. This issue of “Ardeth” collects contributions that will address the ecology of contemporary architectural practice, scrutinizing it as involving actors with variable ontology, scale and politics; exploring empirically different formats

of design and reflecting on the importance of ethnography for understanding contemporary architectural practices.
