Versailles May 12 2022 Few buildings carry such a freight of historical symbolism as the Palace of Versailles. First built as a hunting lodge by Louis XIII in the early seventeenth century, then radically repurposed by his absolutist son Louis XIV, Versailles became the focus of that king's centralised power. Drawing on a new wave of research in recent years, particularly on the buildings and material culture of Versailles, Colin Jones, distinguished historian of early modern France, describes the various building campaigns undertaken by Louis XIV and his formal installation of his court at Versailles in 1682; the ritualized rhythms of life at the court of the Sun King; the palace's variegated fortunes under Revolution, First Empire, Restoration and July Monarchy; its return to the political stage in the Franco-Prussian War; its later role as a venue for treaty signings and proclamations; and its continuing legacy as imposing physical embodiment of the ancien régime.

In Brown's Wake Dec 15 2019 What is the legacy of Brown vs. Board of Education? While it is well known for establishing racial equality as a central commitment of American schools, the case also inspired social movements for equality in education across all lines of difference, including language, gender, disability, immigration status, socio-economic status, religion, and sexual orientation. Yet

more than a half century after Brown, American schools are more racially separated than before, and educators, parents and policy makers still debate whether the ruling requires all-inclusive classrooms in terms of race, gender, disability, and other differences. In *Brown's Wake* examines the reverberations of Brown in American schools, including efforts to promote equal opportunities for all kinds of students. School choice, once a strategy for avoiding Brown, has emerged as a tool to promote integration and opportunities, even as charter schools and private school voucher programs enable new forms of self-separation by language, gender, disability, and ethnicity. Martha Minow, Dean of Harvard Law School, argues that the criteria placed on such initiatives carry serious consequences for both the character of American education and civil society itself. Although the original promise of Brown remains more symbolic than effective, Minow demonstrates the power of its vision in the struggles for equal education regardless of students' social identity, not only in the United States but also in many countries around the world. Further, she urges renewed commitment to the project of social integration even while acknowledging the complex obstacles that must be overcome. An elegant and concise overview of Brown and its aftermath, *In Brown's Wake* explores the broad-ranging and often surprising impact of one of the century's most important Supreme Court decisions.

Skyscraper Jul 22 2020 Chicago's beautiful Reliance Building, sixteen storeys tall, was designed in 1890 by John Root and completed in 1895 by Charles B. Atwood. In its construction - metal frame, large areas of plate glass, fire-proof brick and terracotta cladding - it pioneers all the key elements of twentieth-century high-rise architecture, and many of the tenets of Modernism. Cruickshank reflects on the extraordinary architectural, artistic and engineering world of the 1890s and its great figures such as Daniel H. Burnham, Louis Sullivan and William Le Baron Jenney. He looks forward to the Reliance building's immediate progeny, such as the 1902 Flatiron Building in New York and to the hubristic high-rise architecture of the twenty-first century. This is also the story of Gilded Age Chicago, which was burned to the ground in 1871. The city - corrupt, violent and fabulously wealthy - was ready to try anything, even revolutionary forms of architecture.

Voyagers Nov 06 2021 An award-winning scholar explores the sixty-thousand-year history of the Pacific islands in this dazzling, deeply researched account. One of the Best Books of 2021 — Wall Street Journal The islands of Polynesia, Melanesia, and Micronesia stretch across a huge expanse of ocean and encompass a multitude of different peoples. Starting with Captain James Cook, the earliest European explorers to visit the Pacific were astounded and perplexed to find populations thriving thousands of miles from continents. Who were these people? From where did they come? And how were they able to reach islands dispersed over such vast tracts of ocean? In *Voyagers*, the distinguished anthropologist Nicholas Thomas charts the course of the seaborne migrations that populated the islands between Asia and the Americas from late prehistory onward. Drawing on the latest research, including insights gained from genetics, linguistics, and archaeology, Thomas provides a dazzling account of these long-distance migrations, the seagoing technologies that enabled them, and the societies they left in their wake.

Messiah Oct 17 2022 In 1741, in just 24 days, the German-born, British-naturalized composer George Frideric Handel wrote an oratorio rich in tuneful arias and choruses of robust grandeur. Coolly received in London at first, after Handel's death *Messiah* enjoyed an extraordinary surge in popularity: it was performed at festivals across England; other composers rushed to rearrange it; it would be commercially recorded on more than 100 occasions. Jonathan Keates tells the story of the composition and musical afterlife of Handel's masterpiece: he considers the first performances and its place in Handel's output; he looks at the oratorio itself and its relationship with spirituality in the age of the Enlightenment; and he examines why *Messiah* became such an essential element in the national culture of Britain. Illustrated with beautiful images, including the original score of the work, *Messiah* is a richly informative and affectionate celebration of a high-point of Britain's Georgian golden age.

Lentil Sep 23 2020 Young Lentil wants to learn to sing, but no matter how hard he tries he can't sing on key. He can't even pucker his lips to whistle! So Lentil learns to play the harmonica instead and beautifully carries his tune through the winding streets of Alto, Ohio. Lentil masters his craft just as the beloved Colonel Carter returns to town and the Alto residents decide to plan a special celebration. But Old Sneep, the grouchiest man in town, doesn't want anyone celebrating Colonel Carter's homecoming. When Old Sneep stops the welcoming parade in its tracks, Lentil's music turns out to be just what Alto needs. Robert McCloskey, the Caldecott-winning author and illustrator of *Make Way for Ducklings*, brings readers this delightful two color picture book.

City of Light Jan 20 2023 A sparkling account of the nineteenth-century rebuilding of Paris as the most beautiful city in the world, as part of the stunning Landmark Library series. 'This really is an impressive book' Sebastian Faulks. 'Brisk, vivid and unexpectedly stirring... No one writes as evocatively and entertainingly about Paris as Christiansen does' Mail on Sunday. 'Every page is a pleasure, every building, every gas lamp brought shimmering to life... Don't board the Eurostar without a copy' The Times. 'A wonderful book, amazingly vivid... But also a truly original work of scholarship' Theodore Zeldin. In 1853 the French emperor Louis Napoleon inaugurated a vast and ambitious programme of public works, directed by Georges-Eugène Haussmann, the prefect of the Seine. Haussmann's renovation of Paris would transform the old medieval city of squalid slums and disease-ridden alleyways into a 'City of Light' - characterised by wide boulevards, apartment blocks, parks, squares and public monuments, new railway stations and department stores and a new system of public sanitation. *City of Light* charts a fifteen-year project of urban renewal which - despite the interruptions of war, revolution, corruption and bankruptcy - would set a template for nineteenth and early twentieth-century urban planning and create the enduring and globally familiar layout of modern Paris.

Eloise Apr 18 2020 It's Eloise's sixtieth birthday—though she's still not a day over six. Celebrate with a beautifully illustrated hardcover edition of the original classic storybook with gobs of bonus material! Eloise is a very special little girl who lives at The Plaza Hotel in New York City. She may not be pretty yet, but she's definitely already a real person. She loves learning about people who aren't boring. Take Eloise home with you and she'll introduce you to life at The Plaza. You'll be glad you did! In the front of this book we have printed the original Eloise story and pictures, and in the back of it there are sketches and stories by Mr. Hilary Knight (the illustrator), photographs of Miss Kay Thompson when she was young and fabulous and rather like Eloise, and absolutely loads of information that you simply can't get anywhere else. Here's the thing: Whether you are just about to fall in love with Eloise or have already baked her a cake, you ought to have this book. (Charge it please and thank you very much.)

The Pharaohs of Ancient Egypt Jan 08 2022 For more than 3,000 years, Egypt was a great civilization that thrived along the banks of the Nile River. But when its cities crumbled to dust, Egypt's culture and the secrets of its hieroglyphic writings were also lost. The Pharaohs of Ancient

Egypt explains how archaeologists have pieced together their discoveries to slowly reveal the history of Egypt's people, its pharaohs, and its golden days.

The Royal Society Jan 16 2020 An engaging new history of the Royal Society of London, the club that created modern scientific thought Founded in 1660 to advance knowledge through experimentally verified facts, The Royal Society of London is now one of the preeminent scientific institutions of the world. It published the world's first science journal, and has counted scientific luminaries from Isaac Newton to Stephen Hawking among its members. However, the road to truth was often bumpy. In its early years-while bickering, hounding its members for dues, and failing to create its own museum-members also performed sheep to human blood transfusions, and experimented with unicorn horns. In his characteristically accessible and lively style, Adrian Tinniswood charts the Society's evolution from poisoning puppies to the discovery of DNA, and reminds us of the increasing relevance of its motto for the modern world: Nullius in Verba-Take no one's word for it.

Magna Carta Apr 11 2022 A beautifully produced account of the signing, impact and legacy of Magna Carta, a document that became one of the most influential statements in the history of democracy, as part of the stunning landmark library series. On a summer's day in 1215 a beleaguered English monarch met a group of disgruntled barons in a meadow by the river Thames named Runnymede. Beset by foreign crisis and domestic rebellion, King John was fast running out of options. On 15 June he reluctantly agreed to fix his regal seal to a document that would change the world. A milestone in the development of constitutional politics and the rule of law, the 'Great Charter' established an Englishman's right to Habeas Corpus and set limits to the exercise of royal power. For the first time a group of subjects had forced an English king to agree to a document that limited his powers by law and protected their rights. Dan Jones's elegant and authoritative narrative of the making and legacy of Magna Carta is amplified by profiles of the barons who secured it and a full text of the charter in both Latin and English.

The Arab Conquests Jun 13 2022 In the 7th and 8th centuries AD, armies inspired by the new religion of Islam burst out of Arabia to subjugate the Levant, southwest Asia, North Africa and the Iberian peninsula. These Arab conquests followed immediately after the Prophet Mohammed's death in 632. By this time, against all the odds, he had managed to unite the feuding tribes of Arabia at the point of his sword. The Muslim conquests lasted until 750, by which time several generations of marauding Arab armies had carved out an Islamic empire (the Umayyad empire, centred on Baghdad) which, in size and population, rivalled that of Rome at its zenith, extending from the shores of the Atlantic in the west to the snow-bounds mountains of Central Asia and the borders of China in the east. In the process they had completely crushed one great empire (the old empire of Byzantium), and hollowed out another (that of the Iranian Sassanids). The Arab Conquests represent one of the greatest feats of arms in history and utterly changed the world. Justin Marozzi, much-praised author of *The Man Who Invented History* and *Baghdad: City of Peace, City of Blood*, tells their story with unflinching narrative verve and deep scholarly authority.

A Spectre, Haunting Nov 18 2022 China Miéville's riveting engagement with the Communist Manifesto offers a lyrical introduction and a spirited defense of the modern world's most influential political document. Few written works can so confidently claim to have shaped the course of history as Karl Marx and Friedrich Engels's Manifesto of the Communist Party. Since first rattling the gates

of the ruling order in 1848, this incendiary pamphlet has never ceased providing fuel for the fire in the hearts of those who dream of a better world. Nor has it stopped haunting the nightmares of those who sit atop the vastly unequal social system it condemns. In this strikingly imaginative introduction, China Miéville provides readers with a guide to understanding the Manifesto and the many specters it has conjured. Through his unique and unorthodox reading, Miéville offers a spirited defense of the enduring relevance of Marx and Engels' ideas. Presented along with the full text of the Communist Manifesto, Miéville's guide has something to offer first-time readers, revolutionary partisans, and even the most hard-nosed skeptics.

Olympia Feb 09 2022 In the northwestern corner of the great peninsula of the Peloponnese, close to the meeting point of the Cladeus and Alpheus rivers, lies a peaceful river valley overlooked by the steep-sided Hill of Cronus. Here, between the eighth century BCE and the fourth century CE, rival athletes competed for glory in the ancient Olympic Games. Every four years, and from every corner of the Mediterranean world - from Samos to Syracuse and from Sparta to Smyrna - they descended on this quiet corner of southern Greece sacred to Zeus, seeking to excel in disciplines as diverse as sprinting, boxing, wrestling, trumpet blowing and chariot and mulecart racing. The victors of these ancient games may have been awarded crowns of olive leaves in recognition of their achievements, but these original Olympics were no idealistic celebration of the classical aesthetic of grace and beauty shared by all of the participating Greek city-states, but often a bitterly contested struggle between political rivals. Robin Waterfield paints a vivid picture of the reality of the ancient Olympic Games; describes the events in which competitors took part; explores their purpose, rituals and politics; and charts the vicissitudes of their remarkable thousand-year history.
