*This edited volume reviews the latest advances in policies and actions in understanding the science, impacts and management of climate change in Indonesia. Indonesia is one of the most vulnerable countries to climate change due to its geographical, physical, and social-economic*

situations. There are many initiatives to understand and deal with the impacts in the country. The national government has issued key guiding policies for climate change. International agencies together with local stakeholders are working on strengthening the capacity in the policy formulations and implement actions to build community resilience. Universities are conducting research on climate change related at different scales. Cities and local governments are implementing innovations in adapting to the impacts of climate change and transiting toward green economy. This book summarizes and discusses the state-of-the-art regarding climate change in Indonesia including adaptation and mitigation measures. The primary readership of the book includes policy makers, scientists and practitioners of climate change actions in Indonesia and other countries facing similar challenges. A uniquely terrifying thriller that breaks all of the commandments...with a vengeance. Not since Cain and Abel have there been two brothers like...The Hancock Boys. What if two identical twin brothers decided to share a career, a family, a wife, a life? That is exactly what the Hancock boys decided to do. They took turns playing the role of the perfect husband, father, and bestselling novelist while the other lived out his wildest fantasies. It seemed the perfect setup. But what if one of them pushed the game too far? What if there was someone out there who knew their secret? And, worst of all, what if one of the brothers suspected the other of teetering on the edge of sanity? The Hancock boys both know their game is coming to an end. And they have the perfect plan to protect their marriage, their skyrocketing career, and their very lives. The two men must become one. But which brother is willing to make the ultimate sacrifice? And with so much at stake, can

*The book speaks to the need for a regulatory framework with regards to space resource utilization. In doing so, significant elements of the subject matter have been explored, taking into account the different phases of a space mission and the perspectives of the various actors and participants in the space arena. The book tackles the subject matter from a number of angles. An analysis of the current national and international governance frameworks is performed, with regards to resource extraction and utilization in space. The view of established and emerging space nations is analyzed next, specifically with extraction and utilization in mind, and in light of the new United State (US) Commercial Space Launch Competitiveness Act (CSLCA) of 2015. A brief analysis of the various budgets allocated to space exploration is given.*

*Each day in honour of a Parisian tradition, a town crier calls out the local news to all who will listen. Over the course of a few days a number of disturbing messages are slipped into his box, messages of portentous and malicious intent referring to the Black Death. Strange marks have also appeared on the doors of several buildings: symbols once used to ward off the plague. Detective Commissaire Adamsberg begins to sense a connection, even a grotesque menace. Then charred and flea-bitten corpses are found. The press seizes on their plague-like symptoms, and the panic sets in.*

*All organizations outsource. They differ only in the scope and extent of what they procure as goods and services from outside*

entities. These choices drive an organization's financial performance and long-term competitive viability, and establish the tenor of day-to-day operations. Outsourcing can solve many problems, but is also fraught with hidden costs and risks. This monograph examines outsourcing from a lifecycle perspective. This means tracing the full arc from the germination of the idea to outsource, to the assessment of options, to the installation of control mechanisms, to grappling with conflicts that inevitably arise over time, all the way to the sunset of the chosen strategy. The analysis is highly attentive to the details of operational execution, especially regarding how human resources participate in these decision processes and are impacted by the choices made.

Discover the addictive first book in Fred Vargas's internationally acclaimed Jean-Baptiste Adamsberg series 'The hottest property in contemporary crime fiction' Guardian Jean-Baptiste Adamsberg is not like other policemen. His methods appear unorthodox in the extreme: he doesn't search for clues; he ignores obvious suspects and arrests people with cast-iron alibis; he appears permanently distracted. In spite of all this his colleagues are forced to admit that he is a born cop. When strange blue chalk circles start appearing overnight on the pavements of Paris, only Adamsberg takes them - and the increasingly bizarre objects found within them - seriously. And when the body of a woman with her throat savagely cut is found in one, only Adamsberg realises that other murders will soon follow... This volume explores Iran's industrial and trade policy options for achieving sustainable, export-oriented, and pro-employment growth. The first part of the book discusses Iran's economic and industrial development performance, as well as strategies for enhancing capabilities, fostering productive transformation, and developing employment that can result in faster and more inclusive economic growth. It also presents a case study on a leading manufacturing subsector—the automotive industry. The book then offers a set of analyses concerning the country's trade sector, including exchange rate policies, ways to connect to global markets, and accession to the World Trade Organization. In turn, the closing chapters investigate various aspects of Iran's labor market and offer policy recommendations on the creation of productive jobs. Readers will learn about effective industrial, trade, and employment policies that can complement macroeconomic measures adopted by the government. As*

*such, the book will appeal not only to scholars and policy-makers, but also to international investors seeking to understand various core aspects of Iran's industrial and employment structures and trade regime. What do we really know about how and where religions began, and how they spread? In this bold new book, award-winning author Robin Derricourt takes us on a journey through the birth and growth of several major religions, using history and archaeology to recreate the times, places and societies that witnessed the rise of significant monotheistic faiths. Beginning with Mormonism and working backwards through Islam, Christianity and Judaism to Zoroastrianism, Creating God opens up the conditions that allowed religious movements to emerge, attract their first followers and grow. Throughout history there have been many prophets: individuals who believed they were in direct contact with the divine, with instructions to spread a religious message. While many disappeared without trace, some gained millions of followers and established a lasting religion. In Creating God, Robin Derricourt has produced a brilliant, panoramic book that offers new insights on the origins of major religions and raises essential questions about why some succeeded where others failed. In thirteen stories full of wit and energy, Gary Soto illuminates the ordinary lives of young people. Meet Angel, who would rather fork over twenty bucks than have photos of his naked body plastered all over school; Philip, who discovers he has a "mechanical mind," whatever that means; Estela, known as Stinger, who rules Jos 's heart and the racquetball court; and many other kids, all of them with problems as big as only a preteen can make them. Funny, touching, and wholly original, Local News is Gary Soto in top form. Publisher Description In this 3rd edition, the author draws extensively on the recent case-law of the Strasbourg organs to present a wide-ranging account of the protection afforded to refugees under the European Convention on Human Rights. The series consists of a variety*

*of monographs from the fields of Classical Philology and Ancient History. While maintaining a broad thematic and methodological scope, the editors are especially keen on studies showing a thorough and critical engagement with the relevant literary texts and primary sources. In this frightening and surprising novel, the eccentric, wayward genius of Commissaire Adamsberg is pitted against the deep-rooted mysteries of one Alpine village's history and a very present problem: wolves. Disturbing things have been happening up in the French mountains; more and more sheep are being found with their throats torn out. The evidence points to a wolf of unnatural size and strength. However Suzanne Rosselin thinks it is the work of a werewolf. Then Suzanne is found slaughtered in the same manner. Her friend Camille attempts, with Suzanne's son Soliman and her shepherd, Watchee, to find out who, or what, is responsible and they call on Commissaire Adamsberg for help. 'Ingenious. Slick, creepy and full of engaging odd characters, this thriller is a class act' Independent One summer, city boy Sam stays with his uncle. It's all so different from London! There's a river and boats, and a new friend, Rachel. But something strange happens ... One day Sam and Rachel find a strange bird with a long beak that looks like a spoon. It has thin fishing rope round its legs. It certainly can't fly! And who are the two men in black? Jasmine, Simon og Stella søger efter den mystiske by Karminia med de røde tage. Med opgaver og grammatiske øvelser efter hvert kapitel Sir Charles Baskerville is found dead with the footprints of a huge dog beside his body. Everyone thinks that the hound of the Baskervilles, the terrible dog who has cursed the Baskerville family for centuries, is to blame. Sherlock Holmes and Doctor Watson go to investigate the murder. Will they find the murderer before the last surviving member of the family is killed? Reproduction of the original. Strabo's Geography, completed in the early first century AD, is the primary source for the history of Greek geography. This Guide provides*

*the first English analysis of and commentary on this long and difficult text, and serves as a companion to the author's The Geography of Strabo, the first English translation of the work in many years. It thoroughly analyzes each of the seventeen books and provides perhaps the most thorough bibliography as yet created for Strabo's work. Careful attention is paid to the historical and cultural data, the thousands of toponyms, and the many lost historical sources that are preserved only in the Geography. This volume guides readers through the challenges and complexities of the text, allowing an enhanced understanding of the numerous topics that Strabo covers, from the travels of Alexander and the history of the Mediterranean to science, religion, and cult. The Seleukid empire, the principal successor-state of the empire of Alexander the Great, endured for over 200 years and stretched, at its peak, from the Mediterranean to the borders of India. This book provides a wide-ranging study of the empire's economy and the methods used by the Seleukid kings to monetise and manage it so as to extract tribute, rent and taxes as efficiently as possible. It uses a variety of Greek literary sources and inscriptions, cuneiform texts, archaeological, numismatic and comparative evidence to explore in detail the manner of exploitation of their lands and subjects by the Seleukid kings, their city-building activity, the financing of their armies and administration, the use they made of coinage and their methods of financial management. The book adopts a highly original, numerical approach throughout, which leads to a quantified model of the economy of an ancient state. This book studies the Chinese "Belt and Road Initiative" (BRI), also called "New Silk Road", and focuses on its regional and local effects. Written by experts from various fields, it presents a range of case studies on the geopolitical, socio-economic, ecological and cultural implications of the BRI for European regions and their stakeholders. The book is divided into four parts, the first of which discusses the history of and China's motivations for the BRI. The second part explores the global phenomenon from a number of regional standpoints. In turn, the third part presents studies on the political, socio-economic, cultural and ecological implications of the New Silk Road project. The final part highlights the tourism prospects in connection with the Silk Road project, as tourism has established itself as an important economic sector in many regions along the historic Silk Road. This book will appeal to scholars of economics, international relations*
