Hobbies Nov 29 2020 Whether it's needlepoint or woodworking, collecting stamps or dolls, everyone has a hobby, or is told they need one. But why do we fill our leisure time with the activities we do? And what do our hobbies say about our culture? Steven Gelber here traces the history and significance of hobbies from the mid-nineteenth century through the 1950s. Although hobbies are often touted as a break from work, Gelber demonstrates that they reflect and reproduce the values and activities of the workplace by bringing utilitarian rationality into the home, imitating the economic stratification of the marketplace, and reinforcing traditional gender roles. Drawing on a wide array of social and cultural theory, Hobbies fills a critical gap in American cultural history and provides a compelling new perspective on the meaning of leisure.

**Boeing B-17 Flying Fortress** Dec 11 2021 This manual offers a unique perspective on what it takes to restore and operate a B-17 Flying Fortress, as well as a wonderful insight into the engineering and construction of this remarkable airplane. The B-17 is one of the most famous airplanes ever built. Although Boeing's B-17 prototype first flew on July 28, 1935, only a relative handful of B-17s were in the Army Air Corps inventory when America's war started on December 7, 1941. But production quickly accelerated, peaking at 16 airplanes a day in April 1944, before ending in May 1945 with a total of 12,726 aircraft delivered. The B-17 served in every World War II combat zone but is best known for daylight strategic bombing of German industrial targets. B-17s from the Eighth Air Force participated in countless missions from bases in England. These missions often lasted for more than eight hours and struck at targets deep within enemy territory. Because of their long-range capability, formations of Flying Fortresses often flew into battle without fighter escort, relying on their own defensive capabilities. G model Fortresses carrying thirteen .50-cal. machine guns and tight formation flying made famous by the motion picture 12 O'Clock High ensured successful missions.

**Messerschmitt Bf109** Apr 22 2020 The Luftwaffe's Messerschmitt Bf109 single-seat fighter was the main combat adversary of the RAF's Hurricane and Spitfire fighters in the Battle of Britain. It could climb and dive faster than the RAF fighters and its competitive edge in combat was helped by its direct injection fuel system. It also had the edge on both the Spitfire and Hurricane when it came to the punch delivered by its array of machine guns and shell-firing cannon. Its formidable performance and potent armament made the Bf109, arguably, the best fighter of the Battle. This book covers the history of the '109, restoration to flight, the views of owners, pilots and engineers, operating and servicing. There are data boxes covering a wealth of '09 facts and figures, and interviews with owners and pilots (both WW2 Luftwaffe pilots and modern day owner-pilots). Photographs and illustrations are drawn from a variety of sources, including Luftwaffe official wartime manuals, official and private archives, restoration projects in the UK and overseas.
