The title says it all. Concise, straight to the point guidance on developing a winning computer trading system. Copyright © Libri GmbH. All rights reserved. The foundation for all scholarly study in biblical law is the shared assumption that the Covenant Code, as contained in Exodus 20:23-22:33 is the oldest code of laws in the Hebrew Bible, and that all other laws are later revisions of that code. The author of this text strikes that foundation. Develop your own trading system with practical guidance and expert advice In *Building Algorithmic Trading Systems: A Trader's Journey From Data Mining to Monte Carlo Simulation to Live Training*, award-winning trader Kevin Davey shares his secrets for developing trading systems that generate triple-digit returns. With both explanation and demonstration, Davey guides you step-by-step through the entire process of generating and validating an idea, setting entry and exit points, testing systems, and implementing them

in live trading. You'll find concrete rules for increasing or decreasing allocation to a system, and rules for when to abandon one. The companion website includes Davey's own Monte Carlo simulator and other tools that will enable you to automate and test your own trading ideas. A purely discretionary approach to trading generally breaks down over the long haul. With market data and statistics easily available, traders are increasingly opting to employ an automated or algorithmic trading system—enough that algorithmic trades now account for the bulk of stock trading volume. Building Algorithmic Trading Systems teaches you how to develop your own systems with an eye toward market fluctuations and the impermanence of even the most effective algorithm. Learn the systems that generated triple-digit returns in the World Cup Trading Championship Develop an algorithmic approach for any trading idea using off-the-shelf software or popular platforms Test your new system using historical and current market data Mine market data for statistical tendencies that may form the basis of a new system Market patterns change, and so do system results. Past performance isn't a guarantee of future success, so the key is to continually develop new systems and adjust established systems in response to evolving statistical tendencies. For individual traders looking for the next leap forward, Building Algorithmic Trading Systems provides expert guidance and practical advice. From the introductory concepts through sophisticated applications—the most thorough, authoritative guide to harnessing the power of Japanese candlesticks The book that introduced traders everywhere how to unleash the awesome power of Japanese Candlestick is now better than ever! Written by the visionary who introduced candlesticks to traders in the West, this new edition of the international bestseller has been fully updated and revised for today's more competitive and fickle markets. Your complete guide to all things candlesticks, it fills you in on what they are and where they come from, how to read and interpret them and how to use them to anticipate and capitalize on price moves and market changes with a degree of accuracy you never imagined was possible! A rare opportunity to learn about this powerful charting technique from the man who introduced candlesticks to the West and the world's premiere expert Covers the most important candle patterns and breaks each down into its component parts with crystal clear explanations of what each part indicates Details strategies for combining candlesticks with other technical tools to spot big moves and find optimal exits Delivers expert advice and guidance on how to avoid costly candlestick mistakes that even seasoned traders can make Shares proven strategies for using candlesticks for hedging and managing investment risk, along with techniques for making candlesticks a valued tool for swing and day trading This text covers such topics as value, money, agriculture, domestic and foreign trade, war, labour, interest rates, luxuries, and the various government policies that affect these subjects. The theme that unites these disparate subjects is liberty. As Condillac writes near the end of the work, the means to eradicate all the abuses and injustices of government is "to give trade full, complete and permanent freedom". In their preface to the 1997 edition, Shelagh and Walter Eltis wrote, "English language readers . . . will find . . . that the case for competitive market economics has rarely been presented more powerfully." With the low cost of modern computer hardware and software combined with the communication of price data via satellite, a new and rapidly expanding market of traders using computers has developed. This essential book bridges the gap between the basic instruction that comes with software programs and what a trader actually needs to know to develop and text profitable futures trading system. With specific information on how to set up and use computer-generated technical studies of the most popular indicators, the book includes: How to build a trading system tailored to the reader's specific need; Practical instruction on how to display and analyze technical information; Advice for developing well disciplined money management and risk control strategies; techniques for monitoring a trading system to detect if something has gone wrong before major losses occur. Revealing the little-known strategy used by the world's most consistently successful traders, this book profiles those who have made enormous fortunes by following trends. It introduces key concepts of trend following and shows readers how to use it immediately in their own portfolios. John J. Murphy has updated his landmark bestseller Technical Analysis of the Futures Markets, to include all of the financial markets. This outstanding reference has already taught thousands of traders the concepts of technical analysis and their application in the futures and stock markets. Covering the latest developments in computer technology, technical tools, and indicators, the second edition features new material on candlestick charting, intermarket relationships, stocks and stock rotation, plus state-of-the-art examples and figures. From how to read charts to understanding indicators and the crucial role technical analysis plays in investing, readers gain a thorough and accessible overview of the field of technical analysis, with a special emphasis on futures markets. Revised and expanded for the demands of today's financial world, this book is essential reading for anyone interested in tracking and analyzing market behavior. This book shows traders how to use Intermarket Analysis to forecast future equity, index and commodity price movements. It introduces custom indicators and Intermarket based systems using basic mathematical and statistical principles to help traders develop and design Intermarket trading systems appropriate for long term, intermediate, short term and day trading. The metastock code for all systems is included and the testing method is described thoroughly. All systems are back tested using at least 200 bars of historical data and compared using various profitability and drawdown metrics. Do you ever think the stories you hear about great trading, and the gains produced, sound like luck? Do you ever wonder if there is a real method and philosophy behind the success stories? The concepts condensed into Trend Commandments were gleaned from Michael Covel's 15 years of pulling back the curtain on great trend following traders. It is a one of a kind money making experience that forever lays to rest the notion that successful trading is akin to winning the lottery. Winning has a formula, as does losing. Michael Covel nails both head on. Getting rich is a fight; make no mistake about it, but at least now with Trend Commandments you have a primer that allows you to crack the code of the winners. "We're going to raise traders just like they raise turtles in Singapore." So trading guru Richard Dennis reportedly said to his long-time friend William Eckhardt nearly 25 years ago. What started as a bet about whether great traders were born or made became a legendary trading experiment that, until now, has never been told in its entirety. Way of the Turtle reveals, for the first time, the reasons for the success of the secretive trading system used by the

group known as the "Turtles." Top-earning Turtle Curtis Faith lays bare the entire experiment, explaining how it was possible for Dennis and Eckhardt to recruit 23 ordinary people from all walks of life and train them to be extraordinary traders in just two weeks. Only nineteen years old at the time-the youngest Turtle by far-Faith traded the largest account, making more than \$30 million in just over four years. He takes you behind the scenes of the Turtle selection process and behind closed doors where the Turtles learned the lucrative trading strategies that enabled them to earn an average return of over 80 percent per year and profits of more than \$100 million. You'll discover How the Turtles made money-the principles that guided their trading and the step-by-step methods they followed Why, even though they used the same approach, some Turtles were more successful than others How to look beyond the rules as the Turtles implemented them to find core strategies that work for any tradable market How to apply the Turtle Way to your own trades-and in your own life Ways to diversify your trading and limit your exposure to risk Offering his unique perspective on the experience, Faith explains why the Turtle Way works in modern markets, and shares hard-earned wisdom on taking risks, choosing your own path, and learning from your mistakes. The accessible, beneficial guide to developing algorithmic trading solutions The Ultimate Algorithmic Trading System Toolbox is the complete package savvy investors have been looking for. An integration of explanation and tutorial, this guide takes you from utter novice to out-the-door trading solution as you learn the tools and techniques of the trade. You'll explore the broad spectrum of today's technological offerings, and use several to develop trading ideas using the provided source code and the author's own library, and get practical advice on popular software packages including TradeStation, TradersStudio, MultiCharts, Excel, and more. You'll stop making repetitive mistakes as you learn to recognize which paths you should not go down, and you'll discover that you don't need to be a programmer to take advantage of the latest technology. The companion website provides up-to-date TradeStation code, Excel spreadsheets, and instructional video, and gives you access to the author himself to help you interpret and implement the included algorithms. Algorithmic system trading isn't really all that new, but the technology that lets you program, evaluate, and implement trading ideas is rapidly evolving. This book helps you take advantage of these new capabilities to develop the trading solution you've been looking for. Exploit trading technology without a computer science degree Evaluate different trading systems' strengths and weaknesses Stop making the same trading mistakes over and over again Develop a complete trading solution using provided source code and libraries New technology has enabled the average trader to easily implement their ideas at very low cost, breathing new life into systems that were once not viable. If you're ready to take advantage of the new trading environment but don't know where to start, The Ultimate Algorithmic Trading System Toolbox will help you get on board quickly and easily. "Collection of essays drawn from the Encyclopedia of Chicago"--introduction. Every trader will appreciate this reliable, realistic, and systematic approach to trading financial and commodity markets. In a step-by-step manner, the author applies a rigorous mathematical discipline to financial speculation and explain how to analyze markets, forecast price movements, develop trading strategies, and manage trading capital. Kase also unveils several highly sophisticated indicators that are far more precise than conventional technical indicators. Unlike most books on trading, Trading with the Odds contains complete coverage of money management, including the author's own "Kase Dev-Stop," a highly calibrated money management tool. Trading with the Odds also includes: Uses and abuses of conventional technical analysis; New technical indicators for analyzing markets and entering trades. Timing the Market explains how to use technical analysis to trade in the stock, bond and commodity markets. One of the best written, most accessible books on the subject, this new edition has been fully revised and now contains an enlarged section on commodities. Curtis Arnold discusses all the major technical indicators and shows how to put them together in order to provide excellent buy and sell signals in any market. He shows how to identify market support, resistance and momentum and how to determine market sentiment. Timing the Market is one of the great investment classics and is being republished in this revised edition after being unavailable for many years. A technical analysis classic, newly updated to help traders develop and forward-test a high-performance trading system for today's markets In trading, a winning system is everything. While it is theoretically possible to buy a "canned" trading system, most experts agree that the best system is proprietary to each trader--developed, implemented, and tested by the individual to suit his or her exact requirements. A stimulating mix of cutting-edge techniques, timeless principles, and practical guidelines, this updated edition of a technical analysis classic offers traders a comprehensive methodology to develop and implement your own trading system, bridging the gap between analysis and execution. Tushar Chande (Pittsburgh, PA) holds nine U.S. patents for creative solutions to flexible manufacturing problems using high-power lasers and optical fibers. A contributing editor to Technical Analysis of Stocks & Commodities magazine, he has been a registered Commodity Trading Advisor and is the principal author of The New Technical Trader (0-471-59780-5) (Wiley). This text captures the essence of the futures industry. It dissects many of the industry's leading lights, exposes the frauds and pokes fun at the seers who believe they can predict the future. The importance of imagination, independent thinking and discipline to trading success is explained. A breakthrough trading book that provides powerful insights on profitable technical patterns and strategies The Art and Science of Technical Analysis is a groundbreaking work that bridges the gaps between the academic view of markets, technical analysis, and profitable trading. The book explores why randomness prevails in markets most, but not all, of the time and how technical analysis can be used to capture statistically validated patterns in certain types of market conditions. The belief of the book is that buying and selling pressure causes patterns in prices, but that these technical patterns are only effective in the presence of true buying/selling imbalance. The Art and Science of Technical Analysis is supported by extensive statistical analysis of the markets, which will debunk some tools and patterns such as Fibonacci analysis, and endorse other tools and trade setups. In addition, this reliable resource discusses trader psychology and trader learning curves based on the author's extensive experience as a trader and trainer of traders. Offers serious traders a way to think about market problems, understand their own performance, and help

find a more productive path forward Includes extensive research to validate specific money-making patterns and strategies Written by an experienced market practitioner who has trained and worked with many top traders Filled with in-depth insights and practical advice, *The Art and Science of Technical Analysis* will give you a realistic sense of how markets behave, when and how technical analysis works, and what it really takes to trade successfully. The updated edition of the guide to building trading systems that can keep pace with the market The stock market is constantly evolving, and coupled with the new global economic landscape, traders need to radically rethink the way they do business at home and abroad. Enter *Building Winning Trading Systems, Second Edition*, the all-new incarnation of the established text on getting the most out of the trading world. With technology now a pervasive element of every aspect of trading, the issue has become how to create a new system that meets the demands of the altered financial climate, and how to make it work. Giving voice to the question on every trader and investor's lips, the book asks, "How can we build a trading system that will be paramount for our increasingly stressed markets?" The answer? Establish mechanical trading systems that remove human emotion from the equation and form the cornerstone of a complete trading plan and with greater agility, characteristics that are more important than ever given the kinetic pace of the markets. Presents an all-new strategy for trading systems that will show traders how to create systems that will work in the twenty first century Expert advice from highly respected trading authority, George Pruitt Includes a new website featuring updated TradeStation code and shows how to use the world's best investment software platform to develop and utilize trading systems that really work Once again paving the way for traders who want to adapt to their environment, *Building Winning Trading Systems, Second Edition* combines expertise in indicator design and system building in one indispensable volume. It also provides a detailed examination of the personality traits common to the three basic types of trader - trend-following (long to intermediate term), mean reversion (intermediate-term), and short-term (swing and day traders) - and illustrates how a strict adherence to specific types of trading systems can foster a psychological flexibility that will allow you to succeed in all kinds of trading environments: countertrending, choppy, or trending."--Jacket.

Trend Following Mindset brings to life the timeless conversations between Tom Basso and Michael Covel originally featured on Michael's renowned *Trend Following* podcast. In these profound and enlightening exchanges, Tom shares with Michael his deep wisdom on trading, business, life, and the how and why of his mindset. Tom Basso, dubbed Mr. Serenity by Jack Schwager, is one of the most experienced and knowledgeable trend-following traders in the world today—a trading legend who lives life to the fullest. Tom's most important trend following research papers are presented together for the first time, delivering a treasure trove of trading insights. Michael also pulls from Tom his perspective on: How to get started in trading; What trend following is, and how and why it works so well; Constructing your trading system; Position sizing and account management; The work-life balance of a trader; The transition from independent trader to professional money manager; and so much more. *Trend Following Mindset* will teach you the mindset of one of the great trend followers. Most important of all, it will show you how to do as Tom does ... and enjoy the ride. Point and Figure charts are one of the great secrets of the Technical Analysis world. Highly sophisticated and with a thoroughbred pedigree, they can, however, be overlooked by traders today. Jeremy du Plessis - one of the foremost Point and Figure experts in the world - returns with a fully updated second edition of this definitive guide in an effort to redress this imbalance. This second edition, with an extensive revision to the text and introduction of brand new techniques, demystifies the world of Point and Figure charting. It includes a detailed explanation of the history and development of the technique from its invention to the modern day, and covers the makeup of the chart patterns, why they are created, and how to interpret them. Throughout, readers are encouraged to understand Point and Figure charts from first principles, rather than just remember the names of a series of patterns. It is the first major work for 50 years to discuss in depth the original 1-box reversal method of Point and Figure charting and contrast it with the more popular 3-box reversal method. Further, the explanation of how to use Point and Figure charts to project targets and calculate risk-reward ratios is the most comprehensive ever seen. Also featured in the second edition are: - A step-by-step analysis of the FTSE 100 Index using the 3-box method, as well as the NASDAQ Composite Index, using the 1-box method - A detailed discussion of optimising techniques - An in-depth chapter on Analysing Point and Figure charts, extensively rewritten from the first edition - A new explanation of how Point and Figure parameters are chosen and the implications of choosing them - Two new Point and Figure construction methods never seen before - Point and Figure's contribution to market breadth, with a look at bullish percent and two brand new indicators - Full discussion of Point and Figure gaps and how they provide valuable information about the chart - Lesser known, more advanced techniques such as the use of moving averages, parabolic SAR and Bollinger Bands on Point and Figure charts - Price and volume activity histograms and how they provide information about support and resistance All this is illustrated with numerous colour charts and observations from years of trading experience. According to du Plessis, Point and Figure charts are the 'voice of the market'. This book helps you listen to, and understand, that voice. Part of the Market Technicians Association (MTA) Required Reading list. This Compendium gives an outline of the historical, philosophical and ethical aspects of the return of cultural objects (e.g. cultural objects displaced during war or in colonial contexts), cites past and present cases (Maya Temple Facade, Nigerian Bronzes, United States of America v. Schultz, Parthenon Marbles and many more) and analyses legal issues (bona fide, relevant UNESCO and UNIDROIT Conventions, Supreme Court Decisions, procedure for requests etc.). It is a landmark publication that bears testament to the ways in which peoples have lost their entire cultural heritage and analyses the issue of its return and restitution by providing a wide range of perspectives on this subject. Essential reading for students, specialists, scholars and decision-makers as well as those interested in these topics. The ultimate guide to a critical tool for mastering the financial markets A longstanding form of technical analysis, Japanese candlestick charts are a dynamic and increasingly popular technical tool for traders of all skill levels. Known for its versatility, this ancient charting can be fused with every other technical tool available, including traditional Western

technical analysis. Japanese Candlestick Charting Techniques is the most comprehensive and trusted guide to this essential technique. Informed by years of research from a pioneer trader, this book covers everything you need to know, including hundreds of examples that show how candlestick techniques can be used in all of today's markets. This totally updated revision focuses on the needs of today's traders and investors with: * All new charts including more intra-day markets * New candlestick charting techniques * More focus on active trading for swing, online and day traders * New Western techniques in combination with candles * A greater spotlight on capital preservation. From speculation and hedging to futures and equities, candlestick charting is the next level up for both amateur day traders and seasoned technicians, and this book provides expert guidance for putting it into action From the "Father of Candlesticks"--penetrating new Japanese techniques for forecasting and tracking market prices and improving market timing Steve Nison has done it again. The man who revolutionized technical analysis by introducing Japanese candlestick charting techniques to Western traders is back--this time with a quartet of powerful Japanese techniques never before published or used in the West. Stunningly effective on their own, these new techniques pack an even greater wallop when teamed up with traditional trading, investing, or hedging strategies, and Steve Nison shows you how to do it. Beyond Candlesticks provides step-by-step instructions, detailed charts and graphs, and clear-cut guidance on tracking and analyzing results--everything you need to pick up these sharp new tools and take your place at the cutting edge of technical analysis. Critical praise for Steve Nison's first book . ". destined to become the classic reference on the subject." --Charles Lebeau and David Lucas Technical Trader's Bulletin "I believe Steve Nison's new candlestick book is destined to become one of the truly great books for this time period.. Whether you trade futures, commodities, or equities, day trade or hold positions overnight, this book is a must." --Lee Siegfried Investor's Library, Data Broadcasting Corp. "It is hard to be too effusive about the quality of NiSon's work . this is clearly one of the best investment books ever written in terms of covering a subject with pedagogical ability and writing skill. The organization is impeccable . reading it was a pleasure." --Commodity Traders Consumer Report The bestselling author of "Sex, Drugs, and Cocoa Puffs" returns with an all-original nonfiction collection of questions and answers about pop culture, sports, and the meaning of reality. Winning consistently in the futures markets is generally regarded as the single toughest challenge facing traders and investors today. Yet, financial rewards can be quick-in-coming and extraordinarily substantial if these highly leveraged markets are traded correctly and intelligently. In this career capping book, 20 year veteran trader Chick Goslin reveals the incredibly powerful techniques he found to be the most effective for capturing substantial futures profits. A newly expanded and updated edition of the trading classic, Design, Testing, and Optimization of Trading Systems Trading systems expert Robert Pardo is back, and in The Evaluation and Optimization of Trading Strategies, a thoroughly revised and updated edition of his classic text Design, Testing, and Optimization of Trading Systems, he reveals how he has perfected the programming and testing of trading systems using a successful battery of his own time-proven techniques. With this book, Pardo delivers important information to readers, from the design of workable trading strategies to measuring issues like profit and risk. Written in a straightforward and accessible style, this detailed guide presents traders with a way to develop and verify their trading strategy no matter what form they are currently using--stochastics, moving averages, chart patterns, RSI, or breakout methods. Whether a trader is seeking to enhance their profit or just getting started in testing, The Evaluation and Optimization of Trading Strategies offers practical instruction and expert advice on the development, evaluation, and application of winning mechanical trading systems. A guide to tracking market, volume, and price changes brought about by economic globalization and computerized trading, using techniques such as neural networks, fuzzy logic, and expert systems. Covers structural change in stock and derivatives markets, price shocks, integration of technical and fundamental methods, testing strategies for robustness, and improving the performance of existing systems. Includes an appendix on notation and terminology. For stocks, bonds, and futures traders. No bibliography. Annotation copyright by Book News, Inc., Portland, OR "Understanding the Emotional Disorders is the first manual for how to use the IDAS-II and examines important, replicable symptom dimensions contained within five adjacent diagnostic classes in the DSM-5: depressive disorders, bipolar and related disorders, anxiety disorders, obsessive-compulsive and related disorders, and trauma- and stressor-related disorders"-- Using the insights that stem from value charts and price action profiles, Dynamic Trading Indicators shows traders how to develop systems and whole trading programs that implement these exciting new tools. Through an in-depth exploration of how to effectively use these new technical indicators in a complete trading system, Dynamic Trading Indicators provides a framework that allows readers to obtain a view of what a stock will most likely do next. This innovation in chart design opens up new vistas for traders and unlocks the door to unlimited profits. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered--some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future. Mark W. Helweg has worked and traded on the floor of the Chicago Board of Trade and, earlier in his career, partnered with an international CTA with over \$40 million under management to research new trading system technology. David C. Stendahl is cofounder of RINA Systems, a software provider for systematic traders. Stendahl is the author of Profit Strategies: Unlocking Trading Performance with Money Management. A simple, straightforward guide to the fundamentals of technical analysis Technical analysis is a collection of techniques designed to help people make trading decisions. Technical Analysis For Dummies, 2nd Edition explains the basic principles and shows you how to apply these principles in an approachable and non-intimidating way. Since the publication of the first edition of Technical Analysis For Dummies, readers have been faced with many changes to the investment landscape, such as new interest rates, looming bank crises, and

adjusting market climates. This updated edition includes information on the new indicators, hands-on applications for real-world situations, as well as practical examples that reflect today's financial atmosphere. Determine how markets are performing and make decisions using real data Spot investment trends and turning points Improve your profits and your portfolio performance With straightforward coverage of concepts and execution, *Technical Analysis For Dummies* shows you how to make better trading decisions in no time. In her much-praised and highly popular book, *Trading 101*, Sunny Harris offered novices a crash course on the basics of the field. Now, for those looking to continue their education, Harris presents *Trading 102: Getting Down to Business*, an invaluable roadmap to taking the next step - designing an individual trading system and starting a personal trading business. This indispensable reference covers all the bases, including raising capital, regulations, marketing financial services, taxes and systems development. Along with hands-on strategies, proven techniques, and straightforward guidelines for tailoring a system based on individual trading styles, *Trading 102* is packed with a wealth of easy-to-read charts and graphs as well as complete information on:

- * The science of the business.
- * Formulating a sound business plan.
- * Software for systems testing.
- * Psychological traps to avoid.

Trading 102 is required reading for anyone looking to take the big leap into trading for a living. *Integrated Pitchfork Analysis: Basic to Intermediate Level* is an introductory text to the branch of Technical Analysis which uses the Andrews' pitchfork trading technique. Designed for traders with no experience of Pitchfork Analysis this book demonstrates how to analyse the markets and trade using pitchfork analysis, assisting the novice trader in achieving a consistent performance. Written by experienced trader, Dr Mircea Dologa, founder of www.pitchforktrader.com, the book begins by introducing and discussing the basic theory of pitchfork trading, providing a description of the technique, how to analyse the charts and how to make a decision based on that analysis. It then moves on to the more practical aspects about the low risk high-probability trade from its inception to its termination. Crucially expert guidance on money management and risk management techniques - when to get in, when to get out and where to locate the initial or trailing stops is also provided. Ultimately *Integrated Pitchfork Analysis: Basic to Intermediate Level* will teach you how to trade, how to follow the markets and how to consistently make money. Reviews

"Dr. Mircea Dologa picks up where Dr. Alan Andrews left off in his breakthrough studies of "pitchfork" pattern analysis. In his new book, the author has taken the interpretation and application of "pitchfork" patterns to an entirely new level. After studying Dr. Dologa's well written and very well illustrated book I will never look at a chart the same way again. What Dr. Dologa has done with "pitchforks" is absolutely amazing. You've got to read it to believe it. Pitchforks patterns can provide so much practical and useful information that you will be referring to this book over and over. The book ends on a high note with an excellent chapter on Case Studies and Money Management. Traders will want to keep this powerful book handy for frequent reference. Highly recommended." Chuck LeBeau, Director of Quantitative Analysis for SmartStops.net and co-author of *Computer Analysis of the Futures Market*, noted trader, lecturer and trading systems developer. "Dr. Mircea Dologa's book, *Integrated Pitchfork Analysis*, combines the breadth of evolving theory with the depth of experience acquired from years of practical application, leaving almost no stone unturned in an exploration of the Pitchfork and its application to profitable short-term trading. Many of Dr. Dologa's ideas are truly innovative, reflecting his understanding of human nature. It would be difficult to find a more complete coverage of Pitchfork trading. It is a mine of (literally) valuable information."

Tony Plummer, Director, Helmsman Economics Ltd. "It has indeed been a privilege for me to have access to Dr Mircea Dologa's amazing analysis which I consider to be an extremely important contribution to Technical Analysis. His development of *Integrated Pitchfork Analysis* in synergy with existing state-of-the-art trading tools resulting in an easy to use professional edge technique, has not been previously utilized. This undoubtedly increases the improvement of trading accuracy, leading to enhanced confidence with greater profitability for both trading and investing. This book is truly a remarkable achievement in the field of Technical Analysis and Dr. Dologa, like myself, is motivated to educate traders and investors on the wonderful world of Technical Analysis and how it can help them in these volatile markets. I believe Dr. Dologa will join the true Market Masters of the 21st Century." Dawn Bolton-Smith, Founder-Member of the Australian Technical Analysis Association, Senior Technical Analyst, Educator & Writer. "Dr. Mircea Dologa has masterfully defined and delineated the Median Line procedure that is central to Pitchfork Analysis and trading. His basic and intermediate theory and practice is a definitive work in this important realm of technical market analysis." Professor Oliver Henry Pruden, Professor of Business Administration and Executive Director of the Institute for technical Market Analysis, Golden Gate University, San Francisco, USA.
