As the authors were researching material on the COBOL standard, they realized that the planned COBOL 2008 standard (discussed in the 11th edition) did not in fact occur. Some of the items marked as COBOL 2008 in the 11th edition had in fact changed in 2002, and some marked as COBOL 2008 will now finally be changed in the upcoming proposed COBOL 2013 standard. Therefore, in the Update Edition, we have changed the icons to indicate COBOL 2002 changes and the upcoming proposed COBOL 2013 changes. They examine potential responses to those challenges by health services managers and other stakeholders, and they provide a platform for meaningful discussion of opportunities and constraints for management decision makers attempting to implement change. This edition includes 60 case studies--32 of which are brand new--arranged thematically into six sections: The Role of the Manager, Control, Organizational Design, Professional Integration, Adaptation, and Accountability. The new cases include the following: - Better Metrics for Financial Management - What Makes a Patient-Centered Medical Home? - Doing the Right Thing When the Financials Do Not Support Palliative Care - Hearing the Patient Voice: Working with Patient and Family Advisers to Improve the Patient Experience - Managed Care Cautionary Tale: A Case Study in Risk Adjustment and Patient Dumping Learning by example is one of the oldest forms of learning, and the case study approach offers a time-tested way for students and healthcare professionals to develop practical skills that are not easily acquired through lectures.
