This handbook is the first to bring together the latest theory and research on critical approaches to social psychological challenges. Edited by a leading authority in the field, this volume further establishes critical social psychology as a discipline of study, distinct from mainstream social psychology. The handbook explains how critical approaches to social processes and phenomena are essential to fully understanding them, and covers the main research topics in basic and applied social psychology, including social cognition, identity and social relations, alongside overviews of the main theories and methodologies that underpin critical approaches. This volume features a range of leading authors working on key social psychological issues, and highlights a commitment to a social psychology which shuns psychologisation, reductionism and neutrality. It provides invaluable insight into many of the most pressing and distressing issues we face in modern society, including the migrant and refugee crises affecting Europe; the devaluing of black lives in the USA; and the poverty, ill-health, and poor mental well-being that has resulted from ever-increasing austerity efforts in the UK. Including sections on critical perspectives, critical methodologies, and critical applications, this volume also focuses on issues with social cognition, self and identity. This one-stop handbook is an indispensable resource for a range of academics, students and researchers in the fields of psychology and sociology, and particularly those with an interest in social identity, power relations, and critical interventions. This is an analysis of medical ethical concepts based on legal principles and court decisions, describing what actually happens in practice rather than what should happen and where there are no precedents available, what is most likely to happen. This volume brings together contributions on the major economic policy issues which have opened up as a result of the immanent process of European Union Enlargement. The issues analyzed range from modelling and analyzing the costs and benefits of enlargement, to challenges for macroeconomic policy both at the EU level and in the new member countries to the state of affairs in the new member countries with respect to sectoral policy reforms such as those undertaken in the financial sector and in competition policy, and the impact of enlargement on Europe's trade policy agenda. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. This popular, topically organized, and thoroughly updated child and adolescent development text presents you with the best theories, research, and practical advice that developmentalists have to offer today. Authors David R. Shaffer and Katherine Kipp provide you with a current and comprehensive overview of child and adolescent development, written in clear, concise language that talks to you rather than at you. The authors also focus on application showing how theories and research apply to real-life settings. As a result, you will gain an understanding of developmental principles that will help you in your roles as parents, teachers, nurses, day-care workers, pediatricians, psychologists, or in any other capacity by which you may one

Lord Leonard Hoffmann remains one of the most important and influential English jurists. Born in South Africa, he came to England as a Rhodes Scholar to study law at the University of Oxford. After graduating from the Bachelor of Civil Law as Vinerian Scholar, he was elected Stowell Civil Law Fellow of University College. There followed an extremely distinguished judicial career, including 14 years as a member of the Judicial Committee of the House of Lords (from 1995 to 2009). In 2009 Lord Hoffmann returned to the Oxford Law Faculty as a Visiting Professor. In this volume, current and past colleagues of Lord Hoffmann from the University of Oxford examine different aspects of his jurisprudence in diverse areas of private and public law. The contributions are testament to the clarity and creativity of his judicial and extra-judicial writings, to his enduring influence and extraordinary intellectual breadth, and to the respect and affection in which he is held. The doctrine of judicial recusal enables - and may require - a judge who is lawfully appointed to hear and determine a case to stand down from that case, leaving its disposition to another colleague or colleagues. The subject is one of considerable import and moment, not only to 'insiders' in the judiciary, but also to litigants and their lawyers. Understanding the principles which guide recusal is also to understand the fundamentals of judging in the common law tradition. The subject is therefore of considerable interest both at practical and theoretical levels, for it tells us most of what we need to know about what it means "to be a judge" and what the discharge of that constitutional duty entails. Unsurprisingly therefore, the subject has attracted controversy, and some of the most savage criticisms ever directed at particular judges. The book commences with an introduction which is followed by an analysis of the essential features of the law, the legal principles (common-law origins, the law today in the USA, UK and Commonwealth) and the difficulties which currently arise in the cases and by operation of statute. The third part looks at process, including waiver, necessity, appellate review, and final appeals. Three specific problem areas (judicial misconduct in court, prior viewpoints, and unconscious bias) are then discussed. The book ends with the author's reflections on future developments and possible reforms of recusal law. As we progress into the twenty-first century, Wales is acquiring a new identity and greater legislative autonomy. The National Assembly and the Welsh Government have power to create laws specifically for Wales. In parallel, the judicial system in Wales is acquiring greater autonomy in its ability to hold the Welsh public bodies to account. This book examines the principles involved in challenging the acts and omissions of Welsh authorities through the Administrative Court in Wales. It also examines the legal provisions behind the Administrative Court, the principles of administrative law, and the procedures involved in conducting judicial review, as well as other Administrative Court cases. Despite extensive literature on public and administrative law, none are written solely from a Welsh perspective: this book examines the ability of the Welsh people to challenge the acts and omissions of Welsh authorities through the Administrative Court in Wales. The modernization of industrial power systems has been stifled by industry's acceptance of extremely outdated practices. Industry is hesitant to depart from power system design practices influenced by the economic concerns and technology of the post World War II period. In order to break free of outdated techniques and ensure product quality and continuity of operations, engineers must apply novel techniques to plan, design, and implement electrical power systems. Based on the author's 40 years of experience in Industry, *Industrial Power Systems* illustrates the importance of reliable power systems and provides engineers the tools to plan, design, and implement one. Using materials from IEEE courses developed for practicing engineers, the book covers relevant engineering features and modern design procedures, including power system studies, grounding, instrument transformers, and medium-voltage motors. The author provides a number of practical tables, including IEEE and European standards, and design principles for industrial applications. Long overdue, *Industrial Power Systems* provides power engineers with a blueprint for designing electrical systems that will provide continuously available electric power at the quality and quantity needed to maintain operations and standards of production. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Now in its second edition, *Construction Law* is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law. Carbohydrate

Chemistry provides review coverage of all publications relevant to the chemistry of monosaccharides and oligosaccharides in a given year. The amount of research in this field appearing in the organic chemical literature is increasing because of the enhanced importance of the subject, especially in areas of medicinal chemistry and biology. In no part of the field is this more apparent than in the synthesis of oligosaccharides required by scientists working in glycobiology. Glycomedicinal chemistry and its reliance on carbohydrate synthesis is now very well established, for example, by the preparation of specific carbohydrate-based antigens, especially cancer-specific oligosaccharides and glycoconjugates. Coverage of topics such as nucleosides, amino-sugars, alditols and cyclitols also covers much research of relevance to biological and medicinal chemistry. Each volume of the series brings together references to all published work in given areas of the subject and serves as a comprehensive database for the active research chemist. Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research. Compiled by teams of leading authorities in the relevant subject areas, the series creates a unique service for the active research chemist, with regular, in-depth accounts of progress in particular fields of chemistry. Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis.

Roberts and Zuckerman's *Criminal Evidence* is the eagerly-anticipated third of edition of the market-leading text on criminal evidence, fully revised to take account of developments in legislation, case-law, policy debates, and academic commentary during the decade since the previous edition was published. With an explicit focus on the rules and principles of criminal trial procedure, Roberts and Zuckerman's *Criminal Evidence* develops a coherent account of evidence law which is doctrinally detailed, securely grounded in a normative theoretical framework, and sensitive to the institutional and socio-legal factors shaping criminal litigation in practice. The book is designed to be accessible to the beginner, informative to the criminal court judge or legal practitioner, and thought-provoking to the advanced student and scholar: a textbook and monograph rolled into one. The book also provides an ideal disciplinary map and work of reference to introduce non-lawyers (including forensic scientists and other expert witnesses) to the foundational assumptions and technical intricacies of criminal trial procedure in England and Wales, and will be an invaluable resource for courts, lawyers and scholars in other jurisdictions seeking comparative insight and understanding of evidentiary regulation in the common law tradition. Beyond the hype of online learning lies a straightforward question: how do you really deliver worthwhile learning online? This book, based on action research, provides a simple answer to this fundamental question by exploring a key technique that enables teachers and learners to use available technologies happily and successfully. So, what are e-tivities? They are motivating, engaging, purposeful activities developed and led by an e-moderator. They are frameworks for active and interactive online learning. E-tivities are in the hands of the teachers themselves and promote active e-learning. This is not a book about the technology of online learning. Practical, accessible and direct, it looks at personalizing and customizing teaching and learning. Written for use in any topic, subject or course, *E-tivities* explores: the importance of activities in online learning; designing and running e-tivities; the five-stage model of teaching and learning online. Backed up extensive illustrations and case studies, and including a unique collection of 35 Resources for Practitioners, this is a book for all professionals involved in online learning.

In the past thirty or so years, discussions of the status and rights of indigenous peoples have come to the forefront of the United Nations human rights agenda. During this period, indigenous peoples have emerged as legitimate subjects of international law with rights to exist as distinct peoples. At the same time, we have witnessed the establishment of a number of UN fora and mechanisms on indigenous issues, including the UN Permanent Forum on Indigenous Issues, all pointing to the importance that the UN has come to place on the promotion and protection of indigenous peoples' rights. Morgan describes, analyses, and evaluates the efforts of the global indigenous movement to engender changes in UN discourse and international law on indigenous peoples' rights and to bring about certain institutional developments reflective of a heightened international concern. By the same token, focusing on the interaction of the global indigenous movement with the UN system, this book examines the reverse influence, that is, the ways in which interacting with the UN system has influenced the claims, tactical repertoires, and organizational structures of the movement. Covers the proceedings of the resumed 3rd session of the Committee held in New York from 15 to 19 Oct. 2001. Includes draft decisions recommended for adoption by the General Assembly as well as decisions adopted by the Committee which are brought to the attention of the Assembly.
