An elaborately illustrated A to Z of the face, from historical mugshots to Instagram posts. By turns alarming and awe-inspiring, Face offers up an elaborately illustrated A to Z—from the didactic anthropometry of the late-nineteenth century to the selfie-obsessed zeitgeist of the twenty-first. Jessica Helfand looks at the cultural significance of the face through a critical lens, both as social currency and as palimpsest of history. Investigating everything from historical mugshots to Instagram posts, she examines how the face has been perceived and represented over time; how it has been instrumentalized by others; and how we have reclaimed it for our own purposes. From vintage advertisements for a “nose adjuster” to contemporary artists who reconsider the visual construction of race, Face delivers an intimate yet kaleidoscopic adventure while posing universal questions about identity. In 2014, Dr. K. Radhakrishnan was named one of the top ten scientists in the world by Nature magazine—the first Indian scientist to be so honoured. Earlier that year, the Indian Space Research Organization (ISRO) successfully ran the Mars Orbiter Mission, popularly known as the ‘Mangalyaan’ mission. ISRO’s Moon Rover, scheduled for 2018, is also Radhakrishnan’s brainchild. Witness to the

transformation of India's space programme in the early 1980s, Radhakrishnan cut his teeth with the SLV-3 project, the country's first satellite launch vehicle. He worked with stalwarts like Dr Vikram Sarabhai, Dr A.P.J. Abdul Kalam, Prof. Satish Dhawan and Mr Y.S. Rajan, wearing several different hats during his illustrious and challenging career. Radhakrishnan eventually turned major setbacks into roaring successes by his unflinching belief in human endeavour and a commitment to excellence. Packed with invaluable information and insights, this fascinating memoir takes us behind the scenes of India's cutting-edge world of scientific achievement.
