Byzantine Rome and the Greek Popes Dec 07 2021 *Byzantine Rome and the Greek Popes* examines the scope and extent to which the East influenced Rome and the Papacy following the Justinian Reconquest of Italy in the middle of the sixth century through the pontificate of Zacharias and the collapse of the exarchate of Ravenna in 752. A combination of factors resulted in the arrival of significant numbers of easterners in Rome, and those immigrants had brought with them a number of eastern customs and practices previously unknown in the city. Greek influence became apparent in art, religious ceremonial and liturgics, sacred music, the rhetoric of doctrinal debate, the growth of eastern monastic communities, and charitable institutions, and the proliferation of the cults of eastern saints and ecclesiastical feast days and, in particular, devotion to the Theotokos or Mother of God. From the late seventh to the middle of the eighth century, eleven of the thirteen Roman pontiffs were the sons of families of eastern provenance. While conceding that over the course of the seventh century Rome indeed experienced the impact of an important Greek element, some scholars of the period have insisted that the degree to which Rome and the Papacy were 'orientalized' has been exaggerated, while others argue that the extent of their 'byzantinization' has not been fully appreciated. The question has also been raised as to whether Rome's oriental popes were responsible for sowing the seeds of separatism from Byzantium and laying the foundation for a future papal state, or whether they were loyal imperial subjects ever steadfast politically, although not always so in matters of the faith, to the reigning sovereign in Constantinople. Finally, there is the important issue of whether one could still speak of a single and undivided imperium Roman christianum in the seventh and early eighth centuries or whether the concept of imperial unity in the epoch following Gregory the Great was a quaint and fanciful fiction as East and West, ignoring and misunderstanding one another, began to go their separate ways. *Byzantine Rome and the Greek Popes* provides a guide through this complicated and often contradictory history.

Prisoner of the Vatican Jul 22 2020 A Pulitzer Prize winner's "fascinating" account of the political battles that led to the end of the Papal States (Entertainment Weekly). From a National Book Award-nominated author, this absorbing history chronicles the birth of modern Italy and the clandestine politics behind the Vatican's last stand in the battle between the church and the newly created Italian state. When Italy's armies seized the Holy City and claimed it for the Italian capital, Pope Pius IX, outraged, retreated to the Vatican and declared himself a prisoner, calling on foreign powers to force the Italians out of Rome. The action set in motion decades of political intrigue that hinged on such fascinating characters as Garibaldi, King Viktor Emmanuel, Napoleon III, and Chancellor Bismarck. Drawing on a wealth of secret documents long buried in the Vatican archives, David I. Kertzer reveals a fascinating story of outrageous accusations, mutual denunciations, and secret dealings that will leave readers hard-pressed to ever think of Italy, or the Vatican, in the same way again. "A rousing tale of clerical skullduggery and topsy-turvy politics, laced with plenty of cross-border intrigue." —Kirkus Reviews, starred review

A Sudden Terror Jan 16 2020 In 1468, on the final night of Carnival in Rome, Pope Paul II sat enthroned above the boisterous crowd,

when a scuffle caught his eye. His guards had intercepted a mysterious stranger trying urgently to convey a warning—conspirators were lying in wait to slay the pontiff. Twenty humanist intellectuals were quickly arrested, tortured on the rack, and imprisoned in separate cells in the damp dungeon of Castel Sant'Angelo. Anthony D'Elia offers a compelling, surprising story that reveals a Renaissance world that witnessed the rebirth of interest in the classics, a thriving homoerotic culture, the clash of Christian and pagan values, the contest between republicanism and a papal monarchy, and tensions separating Christian Europeans and Muslim Turks. Using newly discovered sources, he shows why the pope targeted the humanists, who were seen as dangerously pagan in their Epicurean morals and their Platonic beliefs about the soul and insurrectionist in their support of a more democratic Church. Their fascination with Sultan Mehmed II connected them to the Ottoman Turks, enemies of Christendom, and the love of the classical world tied them to recent rebellious attempts to replace papal rule with a republic harking back to the glorious days of Roman antiquity. From the cosmetic-wearing, parrot-loving pontiff to the Turkish sultan, savage in war but obsessed with Italian culture, D'Elia brings to life a Renaissance world full of pageantry, mayhem, and conspiracy and offers a fresh interpretation of humanism as a dynamic communal movement.

Pope Francis Nov 06 2021 On March 13, the cardinals of the Catholic Church, gathered to elect a successor to a living Pope for the first time in 600 years, announced a dramatic shift. By elevating Cardinal Jorge Mario Bergoglio of Argentina to become Pope Francis the 266th Pontiff, the cardinals were naming the first-ever Pope from the growing New World to take the helm of the church at a crucial moment. It was a stunning move by a 2,000-year-old institution that has immense influence—with 1.2 billion adherents worldwide—and huge problems, including a decade-old sex-abuse scandal that has shattered faith in the institution, a shortage of priests and secular trends that have drained the church of members and challenged its relevancy in a changing world. From the shocking decision by Pope Benedict XVI to retire, to the introduction of Pope Francis, from the back streets of Buenos Aires to the front row at St. Peter's Square, reporters from *The Wall Street Journal* have chronicled these dramatic weeks in the life of the oldest institution in the world. Now, in a new e-book, *Journal* reporters will present a detailed, timely and original biography of the new Pope Francis, as well as new insight on the bargaining and drama that surrounded his rise. *Pope Francis* will present the full, in-depth story of the church's change in direction and the man charged with leading it, and consider how Pope Francis might address the years of scandal and shortcomings while leading Catholics worldwide toward a deeper faith.

The popes of Rome: from the earliest times to Pius ix, A.D. 1870 Feb 26 2021

Rome and the Invention of the Papacy Jan 20 2023 The remarkable, and permanently influential, papal history known as the *Liber pontificalis* shaped perceptions and the memory of Rome, the popes, and the many-layered past of both city and papacy within western Europe. Rosamond McKitterick offers a new analysis of this extraordinary combination of historical reconstruction, deliberate selection and political use of fiction, to illuminate the history of the early popes and their relationship with Rome. She examines the content, context, and transmission of the text, and the complex relationships between the reality, representation, and reception of authority that it reflects. The *Liber pontificalis* presented Rome as a holy city of Christian saints and martyrs, as the bishops of Rome

established their visible power in buildings, and it articulated the popes' spiritual and ministerial role, accommodated within their Roman imperial inheritance. Drawing on wide-ranging and interdisciplinary international research, *Rome and the Invention of the Papacy* offers pioneering insights into the evolution of this extraordinary source, and its significance for the history of early medieval Europe.

The Early Papacy Aug 23 2020 Adrian Fortescue, a British apologist for the Catholic faith in the early part of the 20th century, wrote this classic of clear exposition on the faith of the early Church in the papacy based upon the writings of the Church fathers until 451. No ultramontanist, Fortescue can be a keen critic of personal failings of various Popes, but he shows through his brilliant assessment of the writings of the Church fathers that the early Church had a clear understanding of the primacy of Peter and a belief in the divinely given authority of the Pope in matters of faith and morals. Referring to the famous passage in Matthew 16: 18 where Jesus confers his authority upon Peter as the head of the Apostles, and the first Pope, Fortescue says that, while Christians can continue to argue about the exact meaning of that passage from Scripture, and the various standards that are used for judgments about correct Christian teaching and belief, the only possible real standard is a living authority, an authority alive in the world at this moment, that can answer your difficulties, reject a false theory as it arises and say who is right in disputed interpretations of ancient documents. Fortescue shows that the papacy actually seems to be one of the clearest and easiest dogmas to prove from the early Church. And it is his hope through this work that it will contribute to a renaissance with regard to the office of the papacy among those in communion with the Bishop of Rome, and that it will assist those outside this communion to seek it out, confident that it is willed by Christ for all who would be joined to him in this life and in the next.

Forced Baptisms Feb 09 2022 This book makes use of newly available archival sources to reexamine the Roman Catholic Church's policy, from the sixteenth to nineteenth centuries, of coercing the Jews of Rome into converting to Christianity. Marina Caffiero, one of the first historians permitted access to important archives, sets individual stories of denunciation, betrayal, pleading, and conflict into historical context to highlight the Church's actions and the Jewish response. Caffiero documents the regularity with which Jews

were abducted from the Roman ghetto and pressured to accept baptism. She analyzes why some Jewish men, interested in gaining a business advantage, were more inclined to accept conversion than the women. The book exposes the complexity of relations between the papacy and the Jews, revealing the Church not as a monolithic entity, but as a network of competing institutions, and affirming the Roman Jews as active agents of resistance.

The Formation of Papal Authority in Late Antique Italy Jul 02 2021 This book is the first cultural history of papal authority in late antiquity. While most traditional histories posit a 'rise of the papacy' and examine popes as politicians, theologians and civic leaders, Kristina Sessa focuses on the late Roman household and its critical role in the development of the Roman church from c.350–600. She argues that Rome's bishops adopted the ancient elite household as a model of good government for leading the church. Central to this phenomenon was the classical and biblical figure of the steward, the householder's appointed agent who oversaw his property and people. As stewards of God, Roman bishops endeavored to exercise moral and material influence within both the pope's own administration and the households of Italy's clergy and lay elites. This original and nuanced study charts their manifold interactions with late Roman households and shows how bishops used domestic knowledge as the basis for establishing their authority as Italy's singular religious leaders.

The Invention of Papal History Apr 11 2022 How was the history of post-classical Rome and of the Church written in the Catholic Reformation? Historical texts composed in Rome at this time have been considered secondary to the city's significance for the history of art. *The Invention of Papal History* corrects this distorting emphasis and shows how historical writing became part of a comprehensive formation of the image and self-perception of the papacy. By presenting and fully contextualising the path-breaking works of the Augustinian historian Onofrio Panvinio (1530-1568), Stefan Bauer shows what type of historical research was possible in the late Renaissance and the Catholic Reformation. Crucial questions were, for example: How were the pontiffs elected? How many popes had been puppets of emperors? Could any of the past machinations, schisms, and disorder in the history of the Church be admitted to the reading public? Historiography in this period by no means consisted entirely of commissioned works written for patrons; rather, a creative interplay existed between, on the one hand, the endeavours of authors to explore the past and, on the other hand, the constraints of ideology and censorship placed on them. *The Invention of Papal History* sheds new light on the changing priorities, mentalities, and cultural standards that flourished in the transition from the Renaissance to the Catholic Reformation.

The Pope who Would be King Mar 30 2021 Days after the assassination of his prime minister in the middle of Rome in November 1848, Pope Pius IX found himself a virtual prisoner in his own palace. The wave of revolution that had swept through Europe now seemed poised to put an end to the popes' thousand-year reign over the Papal States, if not indeed to the papacy itself. Disguising himself as a simple parish priest, Pius escaped through a back door. Climbing inside the Bavarian ambassador's carriage, he embarked on a journey into a fateful exile. Only two years earlier Pius's election had triggered a wave of optimism across Italy. After the repressive reign of the dour Pope Gregory XVI, Italians saw the youthful, benevolent new pope as the man who would at last bring the

Papal States into modern times and help create a new, unified Italian nation. But Pius found himself caught between a desire to please his subjects and a fear--stoked by the cardinals--that heeding the people's pleas would destroy the church. The resulting drama--with a colorful cast of characters, from Louis Napoleon and his rabble-rousing cousin Charles Bonaparte to Garibaldi, Tocqueville, and Metternich--was rife with treachery, tragedy, and international power politics. David Kertzer is one of the world's foremost experts on the history of Italy and the Vatican, and has a rare ability to bring history vividly to life. With a combination of gripping, cinematic storytelling, and keen historical analysis rooted in an unprecedented richness of archival sources, *The Pope Who Would Be King* sheds fascinating new light on the end of rule by divine right in the west and the emergence of modern Europe.

Fountains of Papal Rome (Classic Reprint) Apr 30 2021 Excerpt from *Fountains of Papal Rome* Rome has been called the most religious city in the world because of the number of her churches. With equal propriety, and perhaps with greater justice, she might be called the cleanest city in the world because of the number of her fountains. Pagan emperors and Christian popes alike have found both profit and pleasure in adding another fountain or in making or repairing one more aqueduct to give a still greater supply of water to the Roman populace. No other people, with the possible exception of the Spanish Moors, have so appreciated the value and the beauty of abundant water. The Rise of the Fiscal State in Europe c.1200-1815 Jan 28 2021 In this volume an international team of scholars builds up a comprehensive analysis of the fiscal history of Europe over six centuries. It forms a fundamental starting-point for an understanding of the distinctiveness of the emerging European states, and highlights the issue of fiscal power as an essential prerequisite for the development of the modern state. The study underlines the importance of technical developments by the state, its capacity to innovate, and, however imperfect the techniques, the greater detail and sophistication of accounting practice towards the end of the period. New taxes had been developed, new wealth had been tapped, new mechanisms of enforcement had been established. In general, these developments were made in western Europe; the lack of progress in some fiscal systems, especially those in eastern Europe, is an issue

of historical importance in its own right and lends particular significance to the chapters on Poland and Russia. By the eighteenth century 'mountains of debt' and high debt-revenue ratios had become the norm in western Europe, yet in the east only Russia was able to adapt to the western model by 1815. The capacity of governments to borrow, and the interaction of the constraints on borrowing and the power to tax had become the real test of the fiscal powers of the 'modern state' by 1800-15.

Papal infallibility and supremacy tried by ecclesiastical history, Scripture and reason Mar 18 2020

Rome in America Jun 20 2020 For years, historians have argued that Catholicism in the United States stood decisively apart from papal politics in European society. The Church in America, historians insist, forged an "American Catholicism," a national faith responsive to domestic concerns, disengaged from the disruptive ideological conflicts of the Old World. Drawing on previously unexamined documents from Italian state collections and newly opened Vatican archives, Peter D'Agostino paints a starkly different portrait. In his narrative, Catholicism in the United States emerges as a powerful outpost within an international church that struggled for three generations to vindicate the temporal claims of the papacy within European society. Even as they assimilated into American society, Catholics of all ethnicities participated in a vital, international culture of myths, rituals, and symbols that glorified papal Rome and demonized its liberal, Protestant, and Jewish opponents. From the 1848 attack on the Papal States that culminated in the creation of the Kingdom of Italy to the Lateran Treaties in 1929 between Fascist Italy and the Vatican that established Vatican City, American Catholics consistently rose up to support their Holy Father. At every turn American liberals, Protestants, and Jews resisted Catholics, whose support for the papacy revealed social boundaries that separated them from their American neighbors.

Court and Politics in Papal Rome, 1492–1700 Feb 21 2023 This 2002 book attempts to overcome the traditional historiographical approach to the role of the early modern papacy by focusing on the actual mechanisms of power in the papal court. The period covered extends from the Renaissance to the aftermath of the peace of Westphalia in 1648 - after which the papacy was reduced to a mainly spiritual role. Based on research in Italian and other European archives, the book concentrates on the factions at the Roman court and in the college of cardinals. The sacred college came under great international pressure during the election of a new pope, and consequently such figures as foreign ambassadors and foreign cardinals are examined, as well as political liaisons and social contacts at court. Finally, the book includes an analysis of the ambiguous nature of Roman ceremonial, which was both religious and secular: a reflection of the power struggle both in Rome and in Europe.

Gardens and Gardening in Papal Rome Jun 13 2022 From the late Middle Ages, when it embodied spirituality, through the end of the eighteenth century, when it offered pleasurable surroundings for banquets, poetry readings, and amorous pursuits, the garden figured prominently in everyday Roman life. In this lavishly illustrated history, David Coffin provides a wealth of information on how Italian

gardeners worked with the elements of color, fragrance, sound, shade, architecture, sculpture, and wildlife to achieve a wide variety of sensual effects. In so doing he presents the stages of evolution in classic Italian gardening, which was replaced in the late eighteenth century by the more naturalistic English style. Coffin first considers the role of cloistered gardens in the Middle Ages and shows how they were later incorporated as private spaces within the larger Renaissance gardens. Describing the introduction of sculptural collections and waterworks into gardens during the sixteenth century, he explores some of the rich, often complicated, iconographical programs that emerged. The extension of garden parks in the seventeenth century marks the diminishment of architecture in landscaping and the advent of landscape design as a dominant factor. Throughout this book Coffin concentrates on the garden as a site for entertainment and on the development of design components that eventually permitted gardens to be freely open to the public.

On the Donation of Constantine May 20 2020 Valla (1407-1457) was the most important theorist of the humanist movement. His most famous work is the present volume, an oration in which Valla uses new philological methods to attack the authenticity of the most important document justifying the papacy's claims to temporal rule.

A History of the Papacy from the Great Schism to the Sack of Rome Oct 05 2021 This detailed study of the papacy during the Reformation was first published between 1882 and 1894. The author was an academic and an ordained Anglican. Having studied at Oxford and spent time in the parish of Embleton in Northumberland, he was appointed the first Dixie Professor of Ecclesiastical History at Cambridge, became Bishop of Peterborough and ended his career as Bishop of London.

Papal Bull May 12 2022 How did Europe's oldest political institution come to grips with the disruptive new technology of print? Printing thrived after it came to Rome in the 1460s. Renaissance scholars, poets, and pilgrims in the Eternal City formed a ready market for mass-produced books. But Rome was also a capital city—seat of the Renaissance papacy, home to its bureaucracy, and a hub of international diplomacy—and print played a role in these circles, too. In *Papal Bull*, Margaret Meserve uncovers a critical new dimension of the history of early Italian printing by revealing how the Renaissance popes wielded print as a political tool. Over half a century of war and controversy—from approximately 1470 to 1520—the papacy and its agents deployed printed texts to potent effect, excommunicating enemies, pursuing diplomatic alliances, condemning heretics, publishing indulgences, promoting new traditions, and luring pilgrims and their money to the papal city. Early modern historians have long stressed the innovative press campaigns of the Protestant Reformers, but Meserve shows that the popes were even earlier adopters of the new technology, deploying mass communication many decades before Luther. The papacy astutely exploited the new medium to broadcast ancient claims to authority and underscore the centrality of Rome to Catholic Christendom. Drawing on a vast archive, *Papal Bull* reveals how the Renaissance popes used print to project an authoritarian vision of their institution and their capital city, even as critics launched blistering attacks in

print that foreshadowed the media wars of the coming Reformation. Papal publishing campaigns tested longstanding principles of canon law promulgation, developed new visual and graphic vocabularies, and prompted some of Europe's first printed pamphlet wars. An exciting interdisciplinary study based on new literary, historical, and bibliographical evidence, this book will appeal to students and scholars of the Italian Renaissance, the Reformation, and the history of the book.

Court and Politics in Papal Rome, 1492-1700 Oct 17 2022 This study describes power and politics in Rome and the role of the papacy in European politics during the sixteenth and seventeenth centuries. It attempts to overcome the traditional historiographical approach to the role of the papacy during this period by focusing on the actual mechanisms of power in the papal court--political, personal, spiritual, and ceremonial. Based on new research in Italian and other European archives, it charts the transition from a political to a primarily spiritual power between the Renaissance and the Peace of Westphalia.
