The Schenley Experiment May 17 2022 The Schenley Experiment is the story of Pittsburgh’s first public high school, a social incubator in a largely segregated city that was highly—even improbably—successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program (and pensions) lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of

investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt.

Integrated decades before *Brown v. Board of Education*, Schenley succumbed to default segregation during the “white flight” of the 1970s; it rose again to prominence in the late 1980s, when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace’s reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations—a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn

from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

[Great Books for High School Kids](#) Feb 14 2022 Teachers Rick Ayers and Amy Crawford always wanted to find a guide to the vast world of great books for teenagers—one that didn't talk down or moralize. When they couldn't find one, they set out to create it. An early prototype offered at Cody's Bookstore in Berkeley, California, was an instant success. Great Books for High School Kids is the culmination of their efforts. Collecting recommendations and essays from colleagues and advisers around the country, this is a rollicking, thoughtful, against-

the-grain guide that challenges stodgy notions of what great books are and what kids are ready for. The book starts with seven essays by high school teachers about exciting, exemplary experiences they have had reading books with students in the classroom—from Dorothy Allison's *Bastard Out of Carolina* to Toni Morrison's *Song of Solomon* to Aeschylus's *Oresteia* trilogy. Augmented by an index of more than seventy subjects, the book also has an annotated list of hundreds of Recommended Great Books. The recommendations are playful and irreverent, ambitious and entertaining, and they go way beyond traditional reading lists. From classics to the unexpected, from literary novels to nonfiction, some drama, and even a little poetry, these are all books that teenagers have read with pleasure and can read on their own. *Great Books for High School Kids* is an invitation and a sourcebook for inspiring passionate, lifelong readers—a book that could seriously change the lives of

teachers, of families, and of kids.

**Refugee High** Nov 18 2019

Lit Hub's Most Anticipated of

2021 A year in the life of a

Chicago high school that has

one of the highest proportions

of refugees of any school in the nation “A wondrous tapestry of stories, of young people looking for a home. With deep, immersive reporting, Elly Fishman pulls off a triumph of empathy. Their tales and their school speak to the best of who we are as a nation—and their struggles, their joys, their journeys will stay with you.”

—Alex Kotlowitz, author of *There Are No Children Here* Winner of the Studs and Ida Terkel Award For a century, Chicago’s Roger C. Sullivan High School has been a home to immigrant and refugee students. In 2017, during the worst global refugee crisis in history, its immigrant population numbered close to three hundred—or nearly half the school—and many were refugees new to the country. These young people came from thirty-five different countries, speaking among themselves more than thirty-eight different languages. For these refugee teens, life in Chicago is hardly easy. They have experienced the world at its worst and carry the trauma of the horrific

violence they fled. In America, they face poverty, racism, and xenophobia, but they are still teenagers—flirting, dreaming, and working as they navigate their new life in America. *Refugee High* is a riveting chronicle of the 2017–8 school year at Sullivan High, a time when anti-immigrant rhetoric was at its height in the White House. Even as we follow teachers and administrators grappling with the everyday challenges facing many urban schools, we witness the complicated circumstances and unique education needs of refugee and immigrant children: Alejandro may be deported just days before he is scheduled to graduate; Shahina narrowly escapes an arranged marriage; and Belenge encounters gang turf wars he doesn’t understand. Equal parts heartbreaking and inspiring, *Refugee High* raises vital questions about the priorities and values of a public school and offers an eye-opening and captivating window into the present-day American immigration and

education systems.

*Professional Communities and the Work of High School Teaching* Mar 23 2020

American high schools have never been under more pressure to reform: student populations are more diverse than ever, resources are limited, and teachers are expected to teach to high standards for all students. While many reformers look for change at the state or district level, the authors here argue that the most local contexts—schools, departments, and communities—matter the most to how well teachers perform in the classroom and how satisfied they are

professionally. Their findings—based on one of the most extensive research projects ever done on secondary teaching—show that departmental cultures play a crucial role in classroom settings and expectations. In the same school, for example, social studies teachers described their students as "apathetic and unwilling to work," while English teachers described the same students as "bright, interesting, and energetic." With wide-ranging implications for educational practice and policy, this unprecedented look into teacher communities is essential reading for educators, administrators, and all those concerned with U. S. High Schools.

Personal Narrative, Revised

Jun 25 2020 In this inspirational book, LaMay shows readers how to transform classrooms and schools into places where youth can explore the intersection between literacy and their lives. This book is the culmination of a literacy curriculum that the author and her high school students wrote dialogically, beginning with their attempt to define love. Through real-life classroom examples, they demonstrate how an innovative curriculum that intertwines personal and academic engagement can create space for students to

explore their identities, connect to literary texts, and develop agency as writers and thinkers. In this important contribution to literacy educators, the author shows how personal narratives can help students rebuild their fractured relationships with school and envision writing and academic achievement as playing a role in their futures. Book Features: Evidence of how students' social-emotional and academic growth may intertwine in the interest of school engagement. A re-conceptualization of the complex layers of the personal narrative genre and its role in the pedagogy of academic writing. A reinterpretation of the transformational role of revision in students' academic and life texts. Examples of writing and interview data that illustrate the diversity of student responses. "Heart and mind blend in this remarkable story of a teacher and her students working with courageous determination to create an education that values young people and gives weight

and meaning to their lives.”
