From finding a topic to writing and reviewing your work, *Researching and Writing Dissertations* is an essential tool for anyone working on a dissertation or business report. This new edition is now suitable for students studying the CIPD Level 7 Advanced units Investigating a Business Issue and Using Information in HR but is equally relevant for all non-CIPD students too. Covering everything from strategies for finding and developing a dissertation topic and how to develop a research proposal through to what methodology to use and how to analyse your data, this is the only book you need to write clear, effective and compelling dissertations and reports. In addition to practical guidance on the researching and writing up of projects, this book includes essential guidance on effective time management and how to ensure that projects are completed and submitted on time as well as invaluable insights through real-life student and supervisor comments. Fully supported by online resources including an instructor's manual and lecturer slides as well as templates, checklists and quizzes for students, *Researching and Writing Dissertations* is a book that anyone working on dissertations, research projects or business reports can't afford to be without. Every year, 17 million new cases of attention deficit disorder, or ADD, are diagnosed in children. But medications designed to treat the disorder

don't work for many children and often leave families frustrated and searching for more options. In *The ADD Answer*, Dr. Frank Lawlis draws upon his thirty-five years of experience as a clinical and research psychologist to show parents how they can reclaim their central role in healing their children with comprehensive step-by-step advice on dealing with the problems of ADD. His approach blends the latest medical, nutritional, and psychological treatments that can increase brain function with expert insight into the emotional—and spiritual—support kids need. Including assessment tests geared to help parents understand their child's particular needs and practical information on proven treatment options, *The ADD Answer* explores:

- The role of nutrition in treating the disorder**
- The positive effects of counseling and goal setting**
- Advances in the field of biofeedback**
- The importance of sleep, and much more**

An inspiring and essential guide, *The ADD Answer* will help every family facing the challenges of ADD create a more loving, healthy environment necessary for their child to thrive. A self study guide that includes clear instructions or drill book on Project Management. It includes sections on 'The Math' of Project Management, Networking and looking at task times; looking at rules during project preparation and also includes a section on communication and human relations. A useful list of project management acronyms is also included. This fascinating book explores the technological challenges and applications of providing fast, 'always-on' internet connections to the home. Current delivery mechanisms of broadband into and around the home are explored in depth. In the past decades wide-ranging research on effective integration of technology in instruction have been conducted by various educators and researchers with the hope that the affordances of technology might be leveraged to improve the teaching and learning process. However, in order to put the technology in optimum use, knowledge about how and in what way technology can enhance the instruction is also essential. A number of theories and models have been proposed in harnessing the technology in everyday lessons. Among these attempts Technological and Pedagogical Content Knowledge (TPACK) framework introduced by Mishra and Koehler has emerged as a representation of the complex relationships between technology, pedagogy and content knowledge. The TPACK framework extends the concept of Shulman's pedagogical content knowledge (PCK) which defines the need for knowledge about the content and pedagogical skills in teaching activities. Since then the framework has been embraced by the educational technology practitioners, instructional designers, and educators. TPACK research received increasing attention from education and training community covering diverse range of subjects and academic disciplines and significant progress has been made in recent years. This book attempts to bring the practitioners and researchers to present current directions, trends and approaches, convey experience and findings, and share reflection and vision to improve science teaching and learning with the use of TPACK framework. A wide array of topics will be

covered in this book including applications in teacher training, designing courses, professional development and impact on learning, intervention strategies and other complex educational issues. Information contained in this book will provide knowledge growth and insights into effective educational strategies in integration of technology with the use of TPACK as a theoretical and developmental tool. The book will be of special interest to international readers including educators, teacher trainers, school administrators, curriculum designers, policy makers, and researchers and complement the existing literature and published works. The four vital steps for successful negotiation--explained with wit and clarity by a master negotiator. Using examples from his own broad range of negotiating experiences, Freund presents a "game-plan" approach to negotiating--a technique far more successful than hardball competition or win-win cooperation. Featured in the Netflix series Love, Death & Robots Bestselling author Ken Liu selects his multiple award-winning stories for a groundbreaking collection—including a brand-new piece exclusive to this volume. With his debut novel, The Grace of Kings, taking the literary world by storm, Ken Liu now shares his finest short fiction in The Paper Menagerie and Other Stories. This mesmerizing collection features many of Ken's award-winning and award-finalist stories, including: "The Man Who Ended History: A Documentary" (Finalist for the Hugo, Nebula, and Theodore Sturgeon Awards), "Mono No Aware" (Hugo Award winner), "The Waves" (Nebula Award finalist), "The Bookmaking Habits of Select Species" (Nebula and Sturgeon Award finalists), "All the Flavors" (Nebula Award finalist), "The Litigation Master and the Monkey King" (Nebula Award finalist), and the most awarded story in the genre's history, "The Paper Menagerie" (The only story to win the Hugo, Nebula, and World Fantasy awards). Insightful and stunning stories that plumb the struggle against history and betrayal of relationships in pivotal moments, this collection showcases one of our greatest and original voices. Stories of the fantastic, stories of the science fictional: A young man lives alone on the far side of the moon, an artificial intelligence his only friend and companion. A hex-slinger encounters his dead wife, sword in hand, standing at a twilight crossroads. A young woman in prison for having superpowers is tested. A former Martian marine and her brilliant husband, investigate troubles on a colossal space station orbiting Saturn. A traveling medicine show where real magic happens faces evil in a frontier boomtown in 1901. Plus five more. This story collection is a tribute to a friendship, and the influences writers can have on one another. Dale Ivan Smith met K.C. Ball in 2009, when she was an editor guest at an online writing school. That led to Dale's first sales to K.C.'s online magazine 10Flash Quarterly, a lasting friendship, and a writing partnership. They co-wrote three stories, all of which are included in this collection, including the novella "Silver City," published here for the first time. Four of the other stories, written by Dale, were published by K.C. in 10Flash, while K.C. read and influenced "Persisting" and "Nullified."

Rules Concerning Earthlight and Other Stories of Fantasy and Science Fiction includes introductions to each story, and additional bonus material. In the final novel of the award-winning sci-fi saga, both humans and aliens face destruction as a new time-portal opens a path back to the twenty-second century. Human time-travelers from the sophisticated Galactic Milieu of the twenty-second century came to the Pliocene Epoch seeking a Garden of Eden. What they found was slavery under the knightly Tanu race, who had been exiled to Earth from a far galaxy. Freed by the usurper Aiken Drum, the humans enjoy a brief period of dominance. But now King Aiken's rule is threatened by the dwarfish Firvulag, who scheme to destroy both humans and Tanu in an ultimate Gotterdammerung. This menace becomes almost incidental when Aiken discovers that his realm is about to be invaded by another human who possesses psychic powers even greater than his own. Marc Remillard, the instigator of the Metapsychic Rebellion, nearly conquered the Galactic Milieu before escaping through the time-portal after his defeat. Marc and his followers are out to overthrow Aiken just as a new time-gate is about to be built—one that will provide a two-way portal between the Many-Colored Land and the future world of the Milieu. The Adversary brings Julian May's Locus Award-winning series—which also includes The Many-Colored Land, The Golden Tore, and The Nonborn King—to a rousing climax. "This is a book worthy of high praise... All versions are exceedingly witty and versatile, in verse that ripples from one's lips, pulling all the punches of Plautus, the knockabout king of farce, and proving that the more polished Terence can be just as funny. Accuracy to the original has been thoroughly respected, but look at the humour in rendering Diphilius' play called Synapothnescontes as Three's a Shroud... Students in schools and colleges will benefit from short introductions to each play, to Roman stage conventions, to different types of Greek and Roman comedy, and there is a note on staging, with a diagram illustrating a typical Roman stage and further diagrams of the basic set for each play. The translators have paid more attention to stage directions than is usually given in translations, because they aim to show how these plays worked. In Scrabble, a bingo is when a player uses all seven tiles in one turn--and it's worth an extra 50 points. Now, with this collection of entertaining crosswords crafted by Longo, there's a quick, easy, and fun way to learn those high-scoring bingo words. Fed up with the high tolls charged by your ordinary telephone service? If you're itching to cut the copper cord with your costly, traditional phone service, you need Talk is Cheap, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. Technologies such as VoIP are gaining a great deal of attention these days as more people switch from standard telephone service to phone service via the Internet. But while the cost savings are outstanding, there are some issues with Internet telephony that you should know about. Are the connections reliable? Is the quality

comparable? Will it include 911 services? James Gaskin's *Talk is Cheap* addresses these issues and many more by explaining how to make the switch and what the tradeoffs will be if you opt for Internet telephony over traditional phone services. *Talk is Cheap* focuses on the increasingly popular services from Vonage, which uses VoIP, and Skype--a free service that operates as a peer-to-peer (P2P) network with the ability to turn any PC, Mac, or Pocket PC into a telephone. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and drawbacks of both technologies (including service offerings, quality, capabilities, completion rates, and more). *Talk is Cheap* then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones. A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone. Are we driving off a digital cliff and heading for disaster, unable to focus, maintain concentration, or form the human bonds that make life worth living? Are media and business doomed and about to be replaced by amateur hour? The world, as Nick Bilton—with tongue-in-cheek—shows, has been going to hell for a long, long time, and what we are experiencing is the twenty-first-century version of the fear that always takes hold as new technology replaces the old. In fact, as Bilton shows, the digital era we are part of is, in all its creative and disruptive forms, the foundation for exciting and engaging experiences not only for business but society as well. Both visionary and practical, *I Live in the Future & Here's How It Works* captures the zeitgeist of an emerging age, providing the understanding of how a radically changed media world is influencing human behavior: • With a walk on the wild side—through the porn industry—we see how this business model is leading the way, adapting product to consumer needs and preferences and beating piracy. • By understanding how the Internet is creating a new type of consumer, the “consumnivre,” living in a world where immediacy trumps quality and quantity, we see who is dictating the type of content being created. • Through exploring the way our brains are adapting, we gain a new understanding of the positive effect of new media narratives on thinking and action. One fascinating study, for example, shows that surgeons who play video games are more skillful than their nonplaying counterparts. • Why social networks, the openness of the Internet, and handy new gadgets are not just vehicles for telling the world what you had for breakfast but are becoming the foundation for “anchoring communities” that tame information overload and help determine what news and information to trust and consume and what to

ignore. • Why the map of tomorrow is centered on “Me,” and why that simple fact means a totally new approach to the way media companies shape content. • Why people pay for experiences, not content; and why great storytelling and extended relationships will prevail and enable businesses to engage with customers in new ways that go beyond merely selling information, instead creating unique and meaningful experiences. I Live in the Future & Here’s How It Works walks its own talk by creating a unique reader experience: Semacodes embedded in both print and eBook versions will take readers directly to Bilton’s website (www.NickBilton.com), where they can access videos of the author further developing his point of view and also delve into the research that was key to shaping the central ideas of the book. The website will also offer links to related content and the ability to comment on a chapter, allowing the reader to join the conversation. Tucked away in our hearts for safe-keeping lie the moments we will hold forever - moments of great joy and pride in each other and moments of solemn determination to honor that which we have lost. In this collection of memories, poet Richard Berry shares with clarity, humor, and devotion the tender moments he has tucked away for safe-keeping. While reading Rhymes with Reason: Memories, you will experience a kinship with the poet as a devoted husband, a loving father, an adoring grandfather, a faithful friend, and a follower of Jesus Christ. The moments recalled within these pages chronicle the joys and sorrows of the significant people in Richard Berry's life. These shared memories evoke a warm gentle love for others that will re-kindle the stirrings of your own heart toward those you hold most dear. Sit back, relax and enjoy the memories recalled by "Papaw Berry," as he is lovingly referred to by his seven grandchildren. May you be inspired by him to live your life for that which matters most. -Carmen Y. Berry Cleaveland Richard and his wife, Judy, live in Markle, Indiana and have been married since 1966. Having graduated from Madison High School in 1963. He's volunteered as a reserve deputy sheriff, court appointed special advocate (CASA) and the Zanesville, Indiana Lions Club. With some education in Engineering, business and law; he's received a patent on a tool designed to perfect cutting a "dado" in wood. After undergoing brain surgery three times he decided to put as much on paper as possible for his kids and grandkids for the years to come. Working since retirement from I.K.E.C. in Madison as a draftsman, sign painter and locksmith and a history student of WWII and the Civil War. Dedicating this book to the magnificent seven: Mallory, Gretchen, Jenna, Malachi, Brady, Matthias and Miranda. To remind their grandkids of earlier years. When by chance, Cheyanne a street-wise 25 year old transsexual prostitute recently released from prison, meets Evan, a naive young man ambiguous about his sexual identity, the elements are in place for this erotic thriller. The story fueled by newly inherited wealth, greed, abundant use of crystal methamphetamine, sexual appetites without boundaries and even murder will make the reader laugh or at times cry.

Join Cheyanne and Evan in their journey from the street sex trade on LA's Santa Monica Boulevard to sex celebrity style in the Hollywood Hills and New York City. Read her story as it might have been told to the author by Cheyanne. For readers actually living in the transgendered world, meet new heroes and heroines. For others who chance upon this book you may gain a new understanding and acceptance of a lifestyle you wondered about. Not just another motorcycle club, the Demented Souls have secrets. Secrets that could cost them their lives. This volume contains:

Sadist Gizmo Mac Tuck Sadist: Sadist made a commitment, one that didn't include a woman, at least not one of his own, but was it possible he could have more? Sadist has lived the last ten years with one goal in mind. To make this world safer for people like his family. He lived to protect his fellow Demented Souls, his club brothers. That didn't leave room for the softer parts of life like a wife or family. He didn't know if he could share the secret that kept his brothers alive. But who would be willing to let him keep those secrets from them? Beth was just trying to get through a rough spot. Between work and helping her parents, she was getting by but that was all. Then a tall, tattooed man walked into her salon for a haircut. The last thing she expected was for the man who made her stomach flip to be interested in her. Until he came back and asked her out. Can Beth and Sadist figure out how to make things work or will the secrets and misunderstandings be too much? He gave his loyalty to his club, she wanted his heart. Could they work out a deal? Gizmo: Gizmo Martinez had long since dedicated his life to the Demented Souls and what the club meant. This was no life for a wife or family, and he knew it. But when her sweet charm pulls at something deep inside, can he walk away? Jill wants something more than her work and video games. What she needs is something or someone to add some excitement. Maybe the tattooed man who ran into her, literally, in the grocery store is just the one to show her another side of life? When club business comes between them, can Gizmo and Jill find away over the problem or will the cost be too steep? Mac: Mac had his life in order. His mechanic shop, his brothers and a house where he was comfortable. He thought he had it all, or at least all that he needed. The last thing he expected was the sexy, self-assured woman next door who seemed waiting to knock his life off kilter. Elyse had given up on dating. She didn't have time for it with her job and everything she wanted to do. Besides, she'd never found a man who could step up and be her equal without trying to make her smaller. Then the hot biker who lived next door knocked on her door. But was he more than just another pretty face? Can they work out their differences or are Mac and Elyse destined for another heartbreak? Tuck: Tuck left home more than twenty years ago to be his own man. Now he's called back with the news that both his parents are dead and he needs to be there. He doesn't want to go. He's built a life with the Demented Souls. They've been his family for the last ten years. But something tells him that may be changing. London is stuck in a life she hates. Wishing she'd

gotten out when she had the chance. She's sick of her dead-end job tending bar in Deadwood. Intent on complaining to a friend one night she texts her. or she thought she did. Instead, her message went to a wrong number. With nothing more than miles between them, Tuck and London build a friendship over text. Then Tuck got word he needed to back to where he grew up, which just happened to be less than two hundred miles from where London was. They made plans to meet but when he went to his mother's funeral, he found more there than he'd expected. When they find themselves surrounded by bikes that try to run them off the road, things become terrifying. Can they figure out what's going on before it's too late or will something happen to end things before they find out how much they care about each other? In the new millennium, what secrets lay beyond the far reaches of the universe? What mysteries belie the truths we once held to be self evident? The world of science fiction has long been a porthole into the realities of tomorrow, blurring the line between life and art. Now, in The Year's Best Science Fiction: Thirty-Second Annual Collection the very best SF authors explore ideas of a new world. This venerable collection brings together award winning authors and masters of the field such as Robert Reed, Alastair Reynolds, Damien Broderick, Elizabeth Bear, Paul McAuley and John Barnes. And with an extensive recommended reading guide and a summation of the year in science fiction, this annual compilation has become the definitive must-read anthology for all science fiction fans and readers interested in breaking into the genre. CHINA Their "Three Gorges Project" engineering masterpiece hasn't gone as well as the world was told on CNN by the Communist Party. A disaster would be a more accurate description. Furthermore, an environmental disaster as well. The rice growing region has been decimated for years to come accounting for nearly 20% of their own rice output and India cannot make up the shortfall. This translates to 400 million Chinese with no rice to eat. Three retired US Navy Seals were hired to swim into the fjords along the south coast of China's rugged shorelines to recon the activities there which are beyond the eyes of US satellites above. What the Seals discover and photograph and return to a fishing junk, then transmit back to a secret facility in South America, is the evidence needed to begin plans for retaliation. A major theft and resulting world war would begin. Great Britain's family would abdicate their throne as a result. The Middle East would be shocked. Washington D.C. would be partially cleansed of graft and a "Countervailing Force" would manifest itself somewhere, somehow. But who, or what is it? Spanning over fifty years, Away (Volume 1: Beginnings) is the story of a government science project whose consequences reverberate through the lives of everyone it touches. Stumbling on a breakthrough that could lead to the instantaneous transportation of people, medicines, food, energy and even information across the globe, quantum physicist Alberto Rys begins a quest to develop the technology to its full potential. He's eventually joined by a team of equally brilliant and idiosyncratic souls

drawn to the discovery's nearly limitless promise. As the years progress, they're met with both devastating failure and exhilarating success. However, just as they near their greatest accomplishment, they find themselves suddenly entangled in a web of greed and deceit that ultimately sends Alberto Rys... away. "Foreword: William Dembski, PhD." Darwinism is a 150-year-old icon that has been propped up by unproven suppositions. The scientific discoveries of the last few decades are now kicking out the props. Dr. Kenneth Poppe is convinced the icon is ready to topple. Providing extensive scientific evidence of Darwinism's failures, this career biology instructor uses enlightening analogies and examples to explain the theory's problems: blind-luck assembly of the first cell mathematical "im"probabilities the laws of thermodynamics hypothetical sudden mutations biased mind-sets Spiced with humor and helpful graphics, this popularly targeted text shows readers that--in regard to objections to evolution--"the science is truly there." "A superior resource for students, parents, and private- or public-school educators." Being a firefighter was the only thing Lucinda Gonzales ever wanted to be. While most girls were playing dolls or dress up, she was playing with her brothers in the back yard, pretending to save people from burning buildings. Firefighting is in her blood, passed down from generation to generation. So when she gets the chance to finally get into the academy to become a firefighter, she doesn't hesitate. After her older brother is killed in a burning building, she becomes more determined than ever. She'll be just as successful as her two brothers ahead of her, her father, and her grandfather. Just because she's a girl doesn't change a thing. However, there's one person standing in her way of becoming the greatest. Chief Maddox Lancaster. The dangerously sexy, arrogant as hell fire chief seems to be throwing one obstacle after another at her, but she won't let him stop her. It doesn't matter if the smoldering looks he slides her way are hotter than a five alarm fire. Maddox Lancaster is more dangerous than any burning building—can Lucy take it? The newest Game On! book features over 100 full-color USA-themed puzzles and includes fun and challenging brain games: crosswords, scrambles, math challenges, mazes, and more. Rereleased for Star Trek: The Original Series ' 50th Anniversary, this in-depth analysis of the groundbreaking TV show features an updated introduction by Robert J. Sawyer and foreword by David Gerrold Trekkies and Trekkers alike will get starry-eyed over this eclectic mix of essays on the groundbreaking original Star Trek, one of the most culturally impactful TV shows of the last 50 years. Star Trek scriptwriters D. C. Fontana, David Gerrold, Norman Spinrad, and Howard Weinstein, science fiction writers including Allen Steele and Lawrence Watt-Evans, and various academics share behind-the-scenes anecdotes, discuss the show's enduring appeal and influence, and examine some of the classic features of the series. Inside: Communications and media theorist Paul Levinson shows how the unprecedented success of the "seventy-nine jewels" in syndication changed the way we look at television forever. Star Trek writer D. C. Fontana remembers Gene Roddenberry and what it was like on the set and behind the scenes. Hugo Award-winning author Allen Steele explores the strong science fiction tradition that made the show so great. Cultural theorist Eric Greene details the show's complex dialogue with the Vietnam War, highlighting the evolving stances on interventionist politics. Science fiction novelist DON Debrandt contends that the famously logical Spock isn't quite as rational as Star Trek's writers would have you believe. Scientist Robert A. Metzger proves that Scotty's ability to lie makes him the most valuable member of the Enterprise crew. Fanfiction author Melissa Dickinson explains why we still feel compelled to write our own stories about Kirk, Spock, and the rest of the show's memorable characters. It is not a text to teach any particular programming language, but to be used alongside such a book, or in conjunction with a taught course. In Studying Programming we concentrate on what other books consider too 'obvious' or too 'basic'. We explain the ideas that others assume you know, we describe the things that can make learning to program a frustrating experience if you don't know them. We stay with you through the process from starting with your very first blank screen to working on complex problems within a team. Studying Programming has been written by 9 members of the Computing Education Research Group at the University of Kent. All of us are practicing computing academics who also have a research interest in CS education. So we have a strong classroom background - teaching students on a daily basis - and a strong research background, knowing what has been investigated (and written on) with regard to students' knowledge, conception and difficulties in introductory programming.
