This book investigates some of the learning processes of students of French and German as they begin language learning at an advanced level, a stage which is frequently problematic. By looking at the learning strategies employed by both successful and less successful language students, the author elucidates some of the key cognitive and affective processes which facilitate advanced level language learning. The implications of this for the classroom are discussed in detail, leading to practical recommendations for learning and teaching strategies. A central theme is the need to teach explicitly the proficient use of learning strategies, and suggestions are made as to how this may be achieved in the language classroom. Boys' underachievement in education has now become a global concern, taxing the minds of governments across the Western world. *Boys and Schooling in the Early Years* represents the first major study of its kind to focus specifically on young boys and achievement. It makes a powerful argument for the need to begin tackling the problem of boys' lower educational performance in the early years. This book includes one of the most detailed and up-to-date analyses of national evidence regarding gender differences in educational achievement - from the early years through to the end of compulsory schooling. Together with original and in-depth case studies that vividly capture the differing experiences and perspectives of 5-6 year old boys, the book sets out the nature of the problems facing them in education and highlights a number of practical ways in which these issues can begin to be addressed. This is essential reading for all those working in the early years, who are concerned about boys' lower levels of achievement, and want to know what they can do about it. The transition from GCSE to A-Level can present an overwhelming hurdle to even the brightest and most conscientious student. Based on widespread teacher perceptions that British upper secondary school students entering advanced language courses are poorly prepared, an approach for making the transition to advanced language instruction is suggested. Teachers are invited to use existing syllabuses creatively to develop language awareness as well as language skills. Four aspects of curriculum design and development are discussed: (1) the need to create a new model of progression through language learning; (2) beginning with and building on students' existing strengths and knowledge level, emphasizing collaboration, self-assessment, and study skills; (3) progressing from known to unknown in syllabus content; and (4) incorporating grammar into a syllabus

designed around topics and skills. Specific examples of classroom techniques and activities are provided in French, Spanish, and German. (MSE) Aiming for your very best grades in AQA GCSE Physics?
