JT Victor witnessed all that and more when he was a teacher in inner-city public schools, and he shares it all in this candid account that reveals the shortcomings of a system where most of the problems are caused by adultsnot students. However, colleges continue to prep future teachers on engaging students and maintaining order in the classroom. Meanwhile, nothing is being done about the people in charge who dont have the best interests of students at heart. Penny-pinching politicians, disinterested parents, and school administrators pretending to be leaders make it nearly impossible for battle-weary teachers to do their jobs. Despite it all, most teachers continue to succeed and students continue to learn. It all might seem amusing if it didnt involve our children and tax dollars, which is why you need to know whats going on so it doesnt happen at your school. THE PRINCETON REVIEW GETS RESULTS. The market for tests has not only been expanding rapidly, but has also been changing sharply in structure into a fractured marketplace. Indeed, one of the main features of this book is that the market for standardized testing is highly fractured - with segments of the market facing monopoly conditions, others facing oligopoly conditions and still others where near free-market conditions exist. One of the main premises of the book is that the structures of markets have strong implications for how those markets perform. While this notion is widely accepted among economists, it is not widely appreciated in educational research. A second motivation for the book is that very little scholarly attention has been focused on the standardized testing industry. This topic - the structure of the testing industry and implications for the quality of tests and test use - affects how we evaluate the learning of students, the effectiveness of teaching, the quality of schools and the educational health of the nation. Of particular concern to the authors is one vital aspect of test quality: test validity. This book is the most current and authoritative review and analysis of the market for standardized testing.
