New York Times Bestseller In the tradition of Jon Krakauer's Into Thin Air and Sebastian Junger's The Perfect Storm comes a true tale of riveting adventure in which two weekend scuba divers risk everything to solve a great historical mystery—and make history themselves. For John Chatterton and Richie Kohler, deep wreck diving was more than a sport. Testing themselves against treacherous currents, braving depths that induced hallucinatory effects, navigating through wreckage as perilous as a minefield, they pushed themselves to their limits and beyond, brushing against death more than once in the rusting hulks of sunken ships. But in the fall of 1991, not even these courageous divers were prepared for what they found 230 feet below the surface, in the frigid Atlantic waters sixty miles off the coast of New Jersey: a World War II German U-boat, its ruined interior a macabre wasteland of twisted metal, tangled wires, and human bones—all buried under decades of accumulated sediment. No identifying marks were visible on the submarine or the few artifacts brought to the surface. No historian, expert, or government had a clue as to which U-boat the men had found. In fact, the official records all agreed that there simply could not be a sunken U-boat and crew at that location. Over the next six years, an elite team of divers embarked on a quest to solve the mystery. Some of them would not live to see its end. Chatterton and Kohler, at first bitter rivals, would be drawn into a friendship that deepened to an almost mystical sense of brotherhood with each other and with the drowned U-boat sailors—former enemies of their country. As the men’s marriages frayed under the pressure of a shared obsession, their dives grew more daring, and each realized that he was hunting more than the identities of a lost U-boat and its nameless crew. Author Robert Kurson’s account of this quest is at once thrilling and emotionally complex, and it is written with a vivid sense of what divers actually experience when they meet the dangers of the ocean’s underworld. The story of Shadow Divers often seems too amazing to be true, but it all happened, two hundred thirty feet down, in the deep blue sea. "Facts, photos, and fun that will blow your mind!"--Cover. DIV Beautifully written and carefully reasoned, this bold and provocative work upends the conventional wisdom about the American reaction to crisis. Margulies demonstrates that for key elements of the post-9/11 landscape—especially support for counterterrorism policies like torture and hostility to Islam—American identity is not only darker than it was before September 11, 2001, but substantially more repressive than it was immediately after the attacks. These repressive attitudes, Margulies shows us, have taken hold even as the terrorist threat has diminished significantly. Contrary to what is widely imagined, at the moment of greatest perceived threat, when the fear of another attack “hung over the country like a shroud,” favorable attitudes toward Muslims and Islam were at record highs, and the suggestion that America should torture was denounced in the public square. Only much later did it become socially acceptable to favor “enhanced interrogation” and exhibit clear anti-Muslim prejudice. Margulies accounts for this unexpected turn and explains what it means to the nation’s identity as it moves beyond 9/11. We express our values in the same language, but that language can hide profound differences and radical changes in what we actually believe. “National identity,” he writes, “is not fixed, it is made.” /div With hundreds of topics ranging from silly to serious, this book's got the information kids need in a fun and entertaining format that will keep them digging for answers. Includes all kinds of fascinating extra info like top ten lists, weird-but-true facts, explorer profiles, and cool activities.
