An exciting collection of essays connecting postcolonialism and the Gospel of John, written by a group of international scholars, both established and new, from Hispanic, African, Jewish, Chinese, Korean and African-American backgrounds. It explores important topics such as the appropriation of John in settler communities of the United States and Canada, and the use of John in the colonisation of Africa, Asia, Latin America and New Zealand. The interpreters represent communities of borderland dwellers, women in colonised settings, minority ethnic groups within colonised centres and others. In an era of rapid globalisation, increased travel, rising diasporic communities and neo-colonialism, it is crucial that biblical scholars find ways to address this world with critical skill and sensitivity. This book fills this need. On the surface, James Joyce's work is largely apolitical. Through most of the twentieth century he was the proud embodiment of the rootless intellectual. However, perspectives on the colonial history of Ireland have proliferated in recent years, yielding a subtle and complex conception of the Irish postcolonial experience that has become a major theme in current Joyce scholarship. In this volume Leonard Orr brings together a diverse collection of essays situating Joyce in the debates generated by postcolonial theory and discourse. Highly original and often provocative, these essays bring Joyce powerfully within the ambit of postcolonial studies. Featuring an internationally distinguished list of contributors, *Kipling and Beyond* reassesses Kipling's texts and their reception in order to explore new approaches in postcolonial studies. The collection asks why Kipling continues to be a significant cultural icon and what this legacy means in the context of today's Anglo-American globalization. This introductory text explains the historical and theoretical origins of post-colonial theory. The author analyses the concepts and issues involved, explains the meaning of key terms, and interprets the work of some of the major writers concerned. The volume contributes a postcolonial perspective to such topics as textual production, commentarial writings and translations in colonial times, and then moves on to inspect Eurocentric notions embedded in current western biblical interpretation especially in projects such as "Jesus Research." It also contains an overview of and introduction to one of the most challenging and controversial theories of our time, postcolonialism--a theory that gives mediation and representation to Third World people. Though long established in cultural studies, postcolonial theory has not previously been seriously applied to Asian biblical interpretation. Postcolonialism has become one of the most exciting, expanding and challenging areas of literary and cultural studies today. Designed especially for those studying the topic for the first time, *Beginning Postcolonialism* introduces the major areas of concern in a clear, accessible, and organized fashion. It provides an overview of the emergence of

postcolonialism as a discipline and closely examines many of its important critical writings. An increased awareness of the importance of minority and subjugated voices to the histories and narratives which have previously excluded them has led to a wide-spread interest in the effects of colonization and displacement. This collection of essays is the first to apply post-colonial theory to the Middle Ages, and to critique that theory through the excavation of a distant past. The essays examine the establishment of colony, empire, and nationalism in order to expose the mechanisms of oppression through which 'aboriginal' 'native' or simply pre-existent cultures are displaced, eradicated, or transformed. Postcolonialism and Political Theory explores the intersection between the political and the postcolonial through an engagement with, critique of, and challenge to some of the prevalent, restrictive tenets and frameworks of Western political and social thought. It is a response to the call by postcolonial studies, as well as to the urgent need within world politics, to turn towards a multiplicity--largely excluded from globally dominant discourses of community, subjectivity, power and prosperity--constituted by otherness, radical alterity, or subordination to the newly reconsolidated West. The book offers a diverse range of essays that re-examine and open the boundaries of political and cultural modernity's historical domain; that look at how the racialized and gendered and cultured subject visualizes the social from elsewhere; that critique the limits of postcolonial theory and its claim to celebrate diversity; and that complicate the notion of postcolonial politics within settler societies that continue to practice exile of the indigenous. Postcolonialism and Political Theory is an ideal book for graduate and advanced undergraduate level study and for those working both disciplinarily and interdisciplinarily, both inside and outside academia. Deconstructs the field of postcolonial studies. Offers an introduction to the growth area of colonial and postcolonial writing in English. This book combines a contextualising narrative situating key developments in imperial and postcolonial history, with theoretical readings of key texts that illuminate important concepts and definitions, including 'writing back' and 'mimicry'. Unhomely States is the first collection of foundational essays of Canadian postcolonial theory. The essays span the period from 1965 to the present day and approach broad issues of Canadian culture and society. They represent the impassioned conflicts, dissonances, and intersections among postcolonial theorists in English Canada. Theories of Canadian postcolonialism are various and often contending. The questions proliferate: Is Canada postcolonial? Who in Canada is postcolonial? Are some Canadians more postcolonial than others? Together, the essays in this collection demonstrate both the historical development of this vigorous debate and its most prominent current perspectives. The anthology comprises work originally written in English, selected and arranged in order to demonstrate the dynamic nature of these discussions. Included here are essays by many well-known writers and theorists, such as George Grant, Northrop Frye, Margaret Atwood, Dennis Lee, Robert Kroetsch, Linda Hutcheon, Diana Brydon, Thomas King, Terry Goldie, Arun Mukherjee, Smaro Kamboureli, Stephen Slemon, and Roy Miki. The collection covers such topics as anti-colonial nationalism, settler-invader theory, First Nations contexts, postcolonial pedagogy, and critiques of Canadian postcolonialism. A general introduction surveying the current field of postcolonial discourse in English Canada is also included. Postcolonialism offers challenging and provocative ways of thinking about colonial and neocolonial power, about self and other, and about the discourses that perpetuate postcolonial inequality and violence. Much of the seminal work in postcolonialism has been shaped by currents in philosophy, notably Marxism and ethics. "Understanding Postcolonialism" examines the philosophy of postcolonialism in order to reveal the often conflicting systems of thought which underpin it. In so doing, the book presents a reappraisal of the major postcolonial thinkers of the twentieth century. Ranging beyond the narrow selection of theorists to which the field is often restricted, the book explores the work of Fanon and Sartre, Gandhi, Nandy, and the Subaltern Studies Group, Foucault and Said, Derrida and Bhabha, Khatibi and Glissant, and Spivak, Mbembe and Mudimbe. A clear and accessible introduction to the subject, "Understanding Postcolonialism" reveals how, almost half a century after decolonisation, the complex relation between politics and ethics continues to shape postcolonial thought. This pioneering explanation of the Arab Spring will define a new era of thinking about the Middle East. In this landmark book,

Hamid Dabashi argues that the revolutionary uprisings that have engulfed multiple countries and political climates from Morocco to Iran and from Syria to Yemen, were driven by a 'Delayed Defiance' - a point of rebellion against domestic tyranny and globalized disempowerment alike - that signifies no less than the end of Postcolonialism. Sketching a new geography of liberation, Dabashi shows how the Arab Spring has altered the geopolitics of the region so radically that we must begin re-imagining the 'the Middle East'. Ultimately, the 'permanent revolutionary mood' Dabashi brilliantly explains has the potential to liberate not only those societies already ignited, but many others through a universal geopolitics of hope.

Guide To The often complex area of postcolonial theory and literature from its historical origins to contemporary critical thinking and issues. Drawing together theoretical and applied research, this fascinating book illuminates the links between tourism, colonialism and postcolonialism. Significantly, it creates a space for the voices of authors from postcolonial countries. Taking a strikingly interdisciplinary and global approach, *Postcolonialism Cross-Examined* reflects on the current status of postcolonial studies and attempts to break through traditional boundaries, creating a truly comparative and genuinely global phenomenon. Drawing together the field of mainstream postcolonial studies with post-Soviet postcolonial studies and studies of the late Ottoman Empire, the contributors in this volume question many of the concepts and assumptions we have become accustomed to in postcolonial studies, creating a fresh new version of the field. The volume calls the merits of the field into question, investigating how postcolonial studies may have perpetuated and normalized colonialism as an issue exclusive to Western colonial and imperial powers. The volume is the first to open a dialogue between three different areas of postcolonial scholarship that previously developed independently from one another: • the wide field of postcolonial studies working on European colonialism, • the growing field of post-Soviet postcolonial/post-imperial studies, • the still fledgling field of post-Ottoman postcolonial/post-imperial studies, supported by sideways glances at the multidirectional conditions of interaction in East Africa and the East and West Indies. *Postcolonialism Cross-Examined* looks at topics such as humanism, nationalism, multiculturalism, nostalgia, and the Anthropocene in order to piece together a new, broader vision for postcolonial studies in the twenty-first century. By including territories other than those covered by the postcolonial mainstream, the book strives to reframe the "postcolonial" as a genuinely global phenomenon and develop multidirectional postcolonial perspectives. This book provides a timely intervention in the fields of performance studies and theatre history, and to larger issues of global cultural exchange. The authors offer a provocative argument for rethinking the scholarly assessment of how diverse performative cultures interact, how they are interwoven, and how they are dependent upon each other. While the term 'intercultural theatre' as a concept points back to postcolonialism and its contradictions, *The Politics of Interweaving Performance Cultures* explores global developments in the performing arts that cannot adequately be explained and understood using postcolonial theory. The authors challenge the dichotomy 'the West and the rest' - where Western cultures are 'universal' and non-Western cultures are 'particular' - as well as ideas of national culture and cultural ownership. This volume uses international case studies to explore the politics of globalization, looking at new paternalistic forms of exchange and the new inequalities emerging from it. These case studies are guided by the principle that processes of interweaving performance cultures are, in fact, political processes. The authors explore the inextricability of the aesthetic and the political, whereby aesthetics cannot be perceived as opposite to the political; rather, the aesthetic is the political. Helen Gilbert's essay 'Let the Games Begin: Pageants, Protests, Indigeneity (1968-2010)' won the 2015 Marlis Thiersch Prize for best essay from the Australasian Drama, Theatre and Performance Studies Association. *Colonialism/Postcolonialism* is a comprehensive yet accessible guide to the historical and theoretical dimensions of colonial and postcolonial studies. Ania Loomba deftly introduces and examines: key features of the ideologies and history of colonialism the relationship of colonial discourse to literature challenges to colonialism, including anticolonial discourses recent developments in postcolonial theories and histories issues of sexuality and colonialism, and the intersection of feminist and postcolonial thought debates about globalization and postcolonialism Recommended on courses across the academic disciplines and

around the world, Colonialism/Postcolonialism has for some years been accepted as the essential introduction to a vibrant and politically charged area of literary and cultural study. With new coverage of emerging debates around globalization, this second edition will continue to serve as the ideal guide for students new to colonial discourse theory, postcolonial studies or postcolonial theory as well as a reference for advanced students and teachers. This account of imperialism explores recent intellectual, theoretical and conceptual developments in imperial history, including interdisciplinary and post-colonial perspectives. Exploring the links between empire and domestic history, it looks at the interconnections and comparisons between empire and imperial power within wider developments in world history, covering the period from the Roman to the present American empire. The book begins by examining the nature of empire, then looks at continuity and change in the historiography of imperialism and theoretical and conceptual developments. It covers themes such as the relationship between imperialism and modernity, culture and national identity in Britain. Suitable for undergraduates taking courses in imperial and colonial history. "Paolini is concerned with the connections among postcolonialism, globalization, and modernity, and he offers one of the first detailed statements of those connections to be undertaken in the field of IR. Focusing on the Third World, and particularly sub-Saharan Africa, he questions dominant notions of identity and subjectivity in the social sciences."--BOOK JACKET. In this first major study of French colonial and postcolonial cinema, Dina Sherzer compiles essays by some of the foremost scholars on the subject who interrogate and analyze the realities behind the images of the nation's past and present. Through an examination of France and its colonies, multiethnic contemporary France, and cinematic discourses which have been and are being produced about France's colonial past, these authors explore how the images relay underlying assumptions and their relation to historical and political facts. A variety of subjects and viewpoints inform these studies, which cover the entire range of films on that topic. The authors expound upon the role French and Francophone films are currently playing in reconstructing and imagining France's colonial past. Not only do the essays examine how French cinema has represented the encounter of French citizens with individuals from former colonies during the colonial era; they examine how French cinema has portrayed and has come to terms with the cohabitation of former colonial subjects with the French in France. In addition, the book features another postcolonial facet by analyzing films of directors from the former colonies who give their own representation of colonialism and presentation of their culture. This study is a major contribution to postcolonial research. Race, gender, and geography are central themes throughout this book that presents innovative material that contributes to the history of French cinema and emphasizes how cinema participates in and is a part of national culture. Postcolonialism, Decoloniality and Development is a comprehensive revision of Postcolonialism and Development (2009) that explains, reviews and critically evaluates recent debates about postcolonial and decolonial approaches and their implications for development studies. By outlining contemporary theoretical debates and examining their implications for how the developing world is thought about, written about and engaged with in policy terms, this book unpacks the difficult, complex and important aspects of the relationships between postcolonial theory, decoloniality and development studies. The book focuses on the importance of development discourses, the relationship between development knowledge and power, and agency within development. It includes significant new material exploring the significance of postcolonial approaches to understanding development in the context of rapid global change and the dissonances and interconnections between postcolonial theory and decolonial politics. It includes a new chapter on postcolonial theory, development and the Anthropocene that considers the challenges posed by the current global environmental crisis to both postcolonial theory and ideas of development. The book sets out an original and timely agenda for exploring the intersections between postcolonialism, decolonialism and development and provides an outline for a coherent and reinvigorated project of postcolonial development studies. Engaging with new and emerging debates in the fields of postcolonialism and development, and illustrating these through current issues, the book continues to set agendas for diverse scholars working in the fields of development studies, geography,

anthropology, politics, cultural studies and history. Postcolonialism has become one of the most exciting, popular and stimulating fields of literary and cultural studies in recent years. Yet the variety of approaches, the range of debate and the critical vocabularies often used may make it challenging for new students to establish a firm foothold in this area. *Beginning Postcolonialism* is a vital resource for those taking undergraduate courses in postcolonial studies for the first time and has become an established international best-seller in the field. In this fully revised and updated second edition, John McLeod introduces the major areas of concern in a clear, accessible and organised fashion. He provides an overview of the emergence of postcolonialism as a discipline and closely examines its many established critical approaches while also exploring important recent initiatives in the field. In particular, *Beginning Postcolonialism* demonstrates how many key postcolonial ideas and concepts can be effectively applied when reading texts and enables students to develop their own independent thinking about the possibilities and pitfalls of postcolonial critique. *The Relatively New Field Of Post Colonial Studies Is Surrounded By A Great Deal Of Excitement, Confusion And Scepticism. This Volume Provides A Vital Introduction To The Historical Dimensions And Theretical Concepts Associated With Colonial And Postcolonial Discourse. Though The Study Does Not Attempt To Cover Every Major Thinker, Event Or Controversy, It Will Stimulate And Enable To Explore, And To Critique, Further Afield And Is Thus A Must For Any Student Needing To Come To Terms With This Crucial And Complex Area.* Using close readings and thematic studies of contemporary science fiction and postcolonial theory, ranging from discussions of Japanese and Canadian science fiction to a deconstruction of race and (post)colonialism in *World of Warcraft*, This book is the first comprehensive study of the complex and developing relationship between the two areas. Leela Gandhi's *Postcolonial Theory* is a landmark description of the field of postcolonial studies in theoretical terms and its intellectual context. The revised edition of this classic work reaffirms its status as a useful starting point for readers new to the field and a provocative account that opens up possibilities for debate. "Drawing on a course road tested for over a decade, Sharp has delivered an invaluable aid for teaching students about the complex political, cultural and spatial logics of colonialism and post-colonialism. Difficult theoretical jargon is demystified and the generous use of illustrations and quotes from both academic and popular sources means students can work with manageable measures of primary material. This book has succeeded in delivering a meaningful conversation between political economic accounts of development and cultural accounts of identity. It is a must-have for anyone studying colonialism and post-colonialism." - Jane M Jacobs, Institute of Geography, University of Edinburgh *Geographies of Post-Colonialism* introduces the principal themes and theories relating to postcolonialism. Written from a geographical perspective, the text includes extended explanations of the cultural and material aspects of the subject. Exploring post-colonialism through the geographies of imagination, knowledge and power, the text is split into three comprehensive sections: *Colonialisms* discusses Western representations of the 'Other' and the relationship between this and the European self-image. *Neo-colonialisms* discusses the continuing legacies of colonial ways of knowing through an examination of global culture, tourism and popular culture. *Post-colonialisms* discusses the core arguments about post-colonialism and culture with a focus on 'hybridity'. Comprehensive and accessible, illustrated with learning features throughout, *Geographies of Post-Colonialism* will be the key resource for students in human geography and development studies. Indispensable for students of film studies, in this book Reena Dube explores Satyajit Ray's films, and *The Chess Players* in particular, in the context of discourses of labour in colonial and postcolonial conditions. Starting from Daniel Defoe and moving through history, short story and film to the present, Dube widens her analysis with comparisons in which Indian films are situated alongside Hollywood and other films, and interweaves historical and cultural debates within film theory. Her book treats film as part of the larger cultural production of India and provides a historical sense of the cross genre borrowings, traditions and debates that have deeply influenced Indian cinema and its viewers. *Writing and Postcolonialism in the Early Republic* is the first book-length analysis of early American literature through the lens of postcolonial theory. Although the United States represented a

colonizing presence that displaced indigenous peoples and exported imperial culture, American colonists also found themselves exiled, often exploited and abused by the distant metropolitan center. In this innovative book, Edward Watts demonstrates how American post-Revolutionary literature exhibits characteristics of a post-colonial society. Are the “culture wars” over? When did they begin? What is their relationship to gender struggle and the dynamics of class? In her first full treatment of postcolonial studies, a field that she helped define, Gayatri Chakravorty Spivak, one of the world’s foremost literary theorists, poses these questions from within the postcolonial enclave. “We cannot merely continue to act out the part of Caliban,” Spivak writes; and her book is an attempt to understand and describe a more responsible role for the postcolonial critic. *A Critique of Postcolonial Reason* tracks the figure of the “native informant” through various cultural practices—philosophy, history, literature—to suggest that it emerges as the metropolitan hybrid. The book addresses feminists, philosophers, critics, and interventionist intellectuals, as they unite and divide. It ranges from Kant’s analytic of the sublime to child labor in Bangladesh. Throughout, the notion of a Third World interloper as the pure victim of a colonialist oppressor emerges as sharply suspect: the mud we sling at certain seemingly overbearing ancestors such as Marx and Kant may be the very ground we stand on. A major critical work, Spivak’s book redefines and repositions the postcolonial critic, leading her through transnational cultural studies into considerations of globality. Postcolonialism explores the political, social, and cultural effects of decolonization, continuing the anti-colonial deconstruction of western dominance. This Very Short Introduction discusses both the history and key debates of postcolonialism, and considers its importance as a means of changing the way we think about the world. Robert J. C. Young examines the key strategies that postcolonial thought has developed to engage with the impact of sometimes centuries of western political and cultural domination. Situating the discussion in a wide cultural and geographical context, he draws on examples such as the status of indigenous peoples, of those dispossessed from their land, Algerian rai music, and global social and ecological movements. In this new edition he also includes updated material on race, slavery, and postcolonial gender politics. Above all, Young argues that postcolonialism offers a political philosophy of activism that contests the current situation of global inequality, which in a new way continues the anti-colonial struggles of the past and enables us to decolonize our own lives in the present.

ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable. In the last half century, economics has taken over from anthropology the role of drawing the powerful conceptual worldviews that organize knowledge and inform policy in both domestic and international contexts. Until now however, the colonial roots of economic theory have remained relatively unstudied. This book changes that. The wide array of contributions to this book draw on the rapidly growing body of postcolonial studies to critique both orthodox and heterodox economics. This book addresses a large gap in postcolonial studies, which lacks the type of sophisticated analysis of economic questions that it displays in its analysis of culture. The intellectual and disciplinary terrain covered within this book spans economics, history, anthropology, philosophy, literary theory, political science and women's studies. Over the last three decades, our understanding of the city worldwide has been revolutionized by three innovative theoretical concepts – globalisation, postcolonialism and a radically contested notion of modernity. The idea and even the reality of the city has been extended out of the state and nation and re-positioned in the larger global world. In this book Anthony King brings together key essays written over this period, much of it dominated by debates about the world or global city. Challenging assumptions and silences behind these debates, King provides largely ignored historical and cultural dimensions to the understanding of world city formation as well as decline. Interdisciplinary and comparative, the essays address new ways of framing contemporary themes: the imperial and colonial origin of contemporary world and global cities, actually existing postcolonialisms, claims about urban and cultural homogenisation and the role of architecture and built environment in that process.

Also addressed are arguments about indigenous and exogenous perspectives, Eurocentricism, ways of framing vernacular architecture, and the global historical sociology of building types. Wide-ranging and accessible, *Writing the Global City* provides essential historical contexts and theoretical frameworks for understanding contemporary urban and architectural debates. Extensive bibliographies will make it essential for teaching, reference and research. In twelve critical and interdisciplinary essays, this text examines the relationship between the fantastic in novels, movies and video games and real-world debates about nationalism, globalization and cosmopolitanism. Topics covered include science fiction and postcolonialism, issues of ethnicity, nation and transnational discourse. Altogether, these essays chart a new discursive space, where postcolonial theory and science fiction and fantasy studies work cooperatively to expand our understanding of the fantastic, while simultaneously expanding the scope of postcolonial discussions. This seminal work—now available in a 15th anniversary edition with a new preface—is a thorough introduction to the historical and theoretical origins of postcolonial theory. Provides a clearly written and wide-ranging account of postcolonialism, empire, imperialism, and colonialism, written by one of the leading scholars on the topic Details the history of anti-colonial movements and their leaders around the world, from Europe and Latin America to Africa and Asia Analyzes the ways in which freedom struggles contributed to postcolonial discourse by producing fundamental ideas about the relationship between non-western and western societies and cultures Offers an engaging yet accessible style that will appeal to scholars as well as introductory students Brian T. May argues that, contrary to widely held assumptions of postcolonial literary criticism, a distinctive subset of postcolonial novels significantly values and scrupulously explores a healthy individuality. These “extravagant” postcolonial works focus less on collective social reality than on the intimate subjectivity of their characters. Their authors, most of whom received some portion of a canonical western education, do not subordinate the ambitions of their fiction to explicit political causes, but they do create a cosmopolitan rhetorical focus suitable to their well-educated, “western trained,” audiences. May pursues this argument by scrutinizing novels composed during the thirty-year post-independence postcolonial era of Anglophone fiction, a period that began with the Nigerian Chinua Achebe’s *Things Fall Apart* and that ended, many would say, with the Ayatollah Khomeini’s 1989 publication of the Rushdie *Fatwa*. He contends that the postcolonial authors under consideration—Naipaul, Rushdie, Achebe, Rhys, Gordimer, and Coetzee—inherited modernism and refashioned it. His account of their work demonstrates how it reflects and transfigures modernists such as Conrad, Eliot, Yeats, Proust, Joyce and Beckett. Tracing the influence of humanistic virtues and the ethical and aesthetic significance of individualism, May demonstrates that these works of “extravagant postcolonialism” are less postcolonial than they are a continuation and evolution of modernism. *Postcolonialism* is a book that examines the influence of postcolonial theory in critical geographical thought and scholarship. Aimed at advanced-level students and researchers, the book is a lively, stimulating and relevant introduction to ‘postcolonial geography’ that elaborates on the critical interventions in social, cultural and political life this important subfield is poised to make. The book is structured around three intersecting parts – Spaces, 'Identity'/hybridity, Knowledge – that broadly follow the trajectory of postcolonial studies since the late 1970s. It comprises ten main chapters, each of which is situated at the intersections of postcolonialism and critical human geography. In doing so, *Postcolonialism* develops three key arguments. First, that postcolonialism is best conceived as an intellectually creative and practical set of methodologies or approaches for critically engaging existing manifestations of power and exclusion in everyday life and in taken-as-given spaces. Second, that postcolonialism is, at its core, concerned with the politics of representation, both in terms of how people and space are represented, but also the politics surrounding who is able to represent themselves and on what/whose terms. Third, the book argues that postcolonialism itself is an inherently geographical intellectual enterprise, despite its origins in literary theory. In developing these arguments and addressing a series of relevant and international case studies and examples throughout, *Postcolonialism* not only demonstrates the importance of postcolonial theory to the contemporary critical geographical imagination. It also argues that geographers have

much to offer to continued theorizations and workings of postcolonial theory, politics and intellectual debates going forward. This is a book that brings critical analyses of the continued and omnipresent legacies of colonialism and imperialism to the heart of human geography, but also one that returns an avowedly critical geographical disposition to the core of interdisciplinary postcolonial studies. Acheraiou challenges postcolonial discourse analysis and proposes a new model of interpretation that resituates the historical, ideological and conceptual denseness of the Colonial idea. He questions key issues, including hybridity, Otherness and territoriality, and expands the postcolonial field by introducing ground-breaking theoretical concepts. This book provides a valuable and unique introductory text that explains, reviews and critically evaluates recent debates about postcolonial approaches and their implications for development studies A comprehensive analysis of the New Testament from the perspective of postcolonial criticism, this title enables readers to relate biblical texts more sharply to the perennial geopolitical issues of imperialism and colonialism.
