The author of Lincoln's Boys takes us inside Lyndon Johnson's White House to show how the legendary Great Society programs were actually put into practice: Team of Rivals for LBJ. The personalities behind every burst of 1960s liberal reform - from civil rights and immigration reform, to Medicare and Head Start. "Absorbing, and astoundingly well-researched -- all good historians do their homework, but Zeitz goes above and beyond. It's a more than worthwhile addition to the canon of books about Johnson."--NPR "Beautifully written...a riveting portrait of LBJ... Every officeholder in Washington would profit from reading this book." --Robert Dallek, Author of An Unfinished Life: John F. Kennedy, 1917-1963 and Franklin D. Roosevelt: A Political Life LBJ's towering political skills and his ambitious slate of liberal legislation are the stuff of legend: the Civil Rights Act of 1964, the Voting Rights Act of 1965, Medicare, Medicaid, Head Start, and environmental reform. But what happened after the bills passed? One man could not and did not go it alone. Joshua Zeitz reanimates the creative and contentious atmosphere inside Johnson's White House as a talented and energetic group of advisers made LBJ's vision a reality. They desegregated public and private institutions throughout one third of the United States; built Medicare and Medicaid from the ground up in one year; launched federal funding for public education; provided food support for millions of poor children and adults; and launched public television and radio, all in the space of five years, even as Vietnam strained the administration's credibility and budget. Bill Moyers, Jack Valenti, Joe Califano, Harry McPherson and the other staff members who comprised LBJ's inner circle were men as pragmatic and ambitious as Johnson, equally skilled in the art of accumulating power or throwing a sharp elbow. Building the Great Society is the story of how one of the most competent White House staffs in American history - serving one of the most complicated presidents ever to occupy the Oval Office - fundamentally changed everyday life for millions of citizens and forged a legacy of compassion and interventionist government. **New York Times, Wall Street Journal, and USA Today Bestseller** Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making. Meet 12 enterprising and inspiring kids from around the world who have started businesses to help people and the planet Calling all social entrepreneurs! End the trend for fast fashion. Say no to single-use plastic. Provide food to those in need. Be inspired by these real-life children building businesses for a more sustainable future: -Maya from Georgia who is fighting fast fashion -Lena from Germany who is working to end period poverty -Reyhan from Azerbaijan who is promoting green energy -Fabienne from the Netherlands who is reducing paper waste -Chmba from Malawi who is supporting women and girls through arts and education -Thomas from France who is protecting our oceans -Aahan and Amal from the United Kingdom who are putting a stop to single-use straws -Jiahua from China who is redistributing food destined for landfill -Chaeli from South Africa who is campaigning for disability access -Archie from Australia who is an ambassador of the Seabin Project -Jefferson from Kenya who is growing food through sustainable farming -Omid from Italy who is making healthcare more accessible Their acts of social enterprise are bringing positive change. Learn about the work they do and discover how the future of our world starts here . . . with you. The new alpine 'hut' on Monte Rosa, at an altitude of 2883 meters (9458 feet) near Zermatt was opened in September 2009. Featuring discussions, essays on special topics, photographs and plans, this volume documents the building's genesis and planning and the construction of what is a milestone in high alpine architecture. The Republic of Ireland, which declared itself in 1949, allowed the Catholic Church to dominate its civil society and education system. Investment by American and European companies, and a welcoming tax regime, created the 'Celtic Tiger' of the 1990s. That brief burst of good fortune was destroyed by a corrupt political class which encouraged a wild property boom, leaving the country almost bankrupt. What Ireland needs now is a programme of real change. It needs to become a fully modern republic in fact as well as name. This disastrous economic collapse also allows us to think through the kind of multiculturalism that Ireland needs, and to build institutions that can accommodate the sudden influx of migrants who have come to Ireland in the past 15 years. The State should take over the entire education system, for which it pays already, and make it fit for the 21st century. The political system is dysfunctional and is one of the main causes of the debacle we have just experienced. Ireland needs constitutional reform. Politicians have been let get away with murder, and there is a fatalistic sense that nothing can change. The country needs to encourage participation in, and oversight and knowledge of politics, to make people feel that they have a right to challenge the old party machines and to make a difference. It is their country, after all. More than half-a-million business leaders have discovered the power of the StoryBrand Framework, created by New York Times best-selling author and marketing expert Donald Miller. And they are making millions. If you use the wrong words to talk about your product, nobody will buy it. Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers. The StoryBrand process is a proven solution to the struggle business leaders face when talking about their companies. Without a clear, distinct message, customers will not understand what you can do for them and are unwilling to engage, causing you to lose potential sales, opportunities for customer engagement, and much more. In Building a StoryBrand, Donald Miller teaches marketers and business owners to use the seven universal elements of powerful stories to dramatically improve how they connect with customers and grow their businesses. His proven process has helped thousands of companies engage with their existing customers, giving them the ultimate competitive advantage. Building a StoryBrand does this by teaching you: The seven universal story points all humans respond to; The real reason customers make purchases; How to simplify a brand message so people understand it; and How to create the most effective messaging for websites, brochures, and social media. Whether you are the marketing director of a multibillion-dollar company, the owner of a small business, a politician running for office, or the lead singer of a rock band, Building a StoryBrand will forever transform the way you talk about who you are, what you do, and the unique value you bring to your customers. We've outpaced our planet. It's a truth we can no longer escape or ignore. Signs are everywhere. Of the 7 billion people who live on the earth, 2.7 billion struggle to live on less than \$2 per day. Four hundred ocean zones are completely devoid of life, with one dead zone in the Gulf of Mexico estimated to be the size of New Jersey. We use eleven times as much energy as we did just fifty years ago. More of the same is clearly not sustainable. But what can we do? In "Enough Is Enough," Rob Dietz and Dan O'Neill urge us to shift our focus from the symptoms to the cause: the pursuit of never-ending economic growth. Since we live in a world of finite resources, we must change our economic goal from the madness of more to the wisdom of enough. What sets this book apart is its focus on the solution: a prosperous and stable steady-state economy. Dietz and O'Neill describe the features of this economy and explain how to achieve it. They explore specific strategies to limit resource use, stabilize population, achieve a fair distribution of income and wealth, reform the financial system, reduce unemployment, and more—all with the aim of maximizing long-term well-being instead of short-term profits. They also provide advice for changing consumer behavior and shifting the political conversation away from the misguided pursuit of economic growth and toward the things that really matter to people. Ultimately, this book offers more than just a survival strategy. By eliminating the waste and excess that have put the planet in peril, people can lead healthier and happier lives. Filled with fresh ideas and surprising optimism, "Enough Is Enough" is the primer for achieving genuine prosperity and a hopeful future for all. With this comprehensive book, you will learn enough about construction materials and labor to save up to 70 percent on the cost of your home and still have a house more sound than any ready-built structure. You will learn enough about creating a plan so that you or a professional builder can translate your dream into a reality. You will learn enough about good building methods to avoid the "high cost of cheap construction." Written simply enough for the layman to understand, with enough sophisticated knowledge and creative ideas for the professional, here's a book no home builder should be without. Book jacket. Including considerations of sustainability in universities' activities has long since become mainstream. However, there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula. Among the problems that hinder progress in this field, the lack of sound information on how to actually implement it is prominent. Created in order to address this need, this book presents a wealth of information on innovative approaches, methods and tools that may be helpful in translating sustainability principles into practice. The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes. Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving—every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits—whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal. A GRIPPING, FEARLESS EXPLORATION OF MASCULINITY The effects of traditionally defined masculinity have become one of the most prevalent social issues of our time. In this engaging and provocative new book, beloved actor, director, and social activist Justin Baldoni reflects on his own struggles with masculinity. With insight and honesty, he explores a range of difficult, sometimes uncomfortable topics including strength and vulnerability, relationships and marriage, body image, sex and sexuality, racial justice, gender equality, and fatherhood. Writing from experience, Justin invites us to move beyond the scripts we've learned since childhood and the roles we are expected to play. He challenges men to be brave enough to be vulnerable, to be strong enough to be sensitive, to be confident enough to listen. Encouraging men to dig deep within themselves, Justin helps us reimagine what it means to be man enough and in the process what it means to be human. Shares advice for how to grow a small-business enterprise that is both profitable and fulfilling, drawing on the experiences of more than 100 successful women business owners while revealing the benefits of ignoring conventional wisdom and running a company on one's own terms. INSTANT NEW YORK TIMES BESTSELLER WINNER OF THE 2020 NAACP IMAGE AWARD FOR OUTSTANDING LITERARY WORK — BIOGRAPHY/AUTOBIOGRAPHY NOW OPTIONED FOR DEVELOPMENT AS A TV SERIES BY PARAMOUNT TELEVISION STUDIOS AND ANONYMOUS CONTENT “The millennial Becoming . . . Inspiring and empowering.” —Entertainment Weekly “An essential read for women in the workplace today.” —Refinery29 Part-manifesto, part-memoir, from the revolutionary editor who infused social consciousness into the pages of Teen Vogue, an exploration of what it means to come into your own—on your own terms Throughout her life, Elaine Welteroth has climbed the ranks of media and fashion, shattering ceilings along the way. In this riveting and timely memoir, the groundbreaking journalist unpacks lessons on race, identity, and success through her own journey, from navigating her way as the unstoppable child of an unlikely interracial marriage in small-town California to finding herself on the frontlines of a modern movement for the next generation of change makers. Welteroth moves beyond the headlines and highlight reels to share the profound lessons and struggles of being a barrier-breaker across so many intersections. As a young boss and often the only Black woman in the room, she's had enough of the world telling her—and all women—they're not enough. As she learns to rely on herself by looking both inward and upward, we're ultimately reminded that we're more than enough. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Used by sites as varied as Twitter, GitHub, Disney, and Airbnb, Ruby on Rails is one of the most popular frameworks for developing web applications, but it can be challenging to learn and use. Whether you're new to web development or new only to Rails, Ruby on Rails™ Tutorial, Fourth Edition, is the solution. Best-selling author and leading Rails developer Michael Hartl teaches Rails by guiding you through the development of three example applications of increasing sophistication. The tutorial's examples focus on the general principles of web development needed for virtually any kind of website. The updates to this edition include full compatibility with Rails 5, a division of the largest chapters into more manageable units, and a huge number of new exercises interspersed in each chapter for maximum reinforcement of the material. This indispensable guide provides integrated tutorials not only for Rails, but also for the essential Ruby, HTML, CSS, and SQL skills you need when developing web applications. Hartl explains how each new technique solves a real-world problem, and then he demonstrates it with bite-sized code that's simple enough to understand, yet novel enough to be useful. Whatever your previous web development experience, this book will guide you to true Rails mastery. This book will help you install and set up your Rails development environment, including pre-installed integrated development environment (IDE) in the cloud Go beyond generated code to truly understand how to build Rails applications from scratch Learn testing and test-driven development (TDD) Effectively use the Model-View-Controller (MVC) pattern Structure applications using the REST architecture Build static pages and transform them into dynamic ones Master the Ruby programming skills all Rails developers need Create high-quality site layouts and data models Implement registration and authentication systems, including validation and secure passwords Update, display, and delete users Upload images in production using a cloud storage service Implement account activation and password reset, including sending email with Rails Add social features and microblogging, including an introduction to Ajax Record version changes with Git and create a secure remote repository at Bitbucket Deploy your applications early and often with Heroku Learn only the essential aspects of Python without cluttering up your mind with features you may never use. This compact book is not a "best way to write code" type of book; rather, the author goes over his most-used functions, which are all you need to know as a beginner and some way beyond. Lean Python takes 58 Python methods and functions and whittles them down to 15: as author Paul Gerrard says, "I haven't found a need for the rest." What You'll Learn Discover lean Python and how to learn just enough to build useful tools Use Python objects, program structure, I/O, modules and more Handle errors and exceptions Test your code Access the Web; do searching; and persist data Who This Book Is For This book is aimed at three categories of reader: The experienced programmer – if you already know a programming language, this book gives you a shortcut to understanding the Python language and some of its design philosophy. You work in IT and need a programming primer – you might be a tester who needs to have more informed technical discussions with programmers. Working through the examples will help you to appreciate the challenge of good programming. First-timer – you want a first book on programming that you can assimilate quickly to help you decide whether programming is for you. A revolutionary approach to enhancing productivity, creating flow, and vastly increasing your ability to capture, remember, and benefit from the unprecedented amount of information all around us. For the first time in history, we have instantaneous access to the world's knowledge. There has never been a better time to learn, to contribute, and to improve ourselves. Yet, rather than feeling empowered, we are often left feeling overwhelmed by this constant influx of information. The very knowledge that was supposed to set us free has instead led to the paralyzing stress of believing we'll never know or remember enough. Now, this eye-opening and accessible guide shows how you can easily create your own personal system for knowledge management, otherwise known as a Second Brain. As a trusted and organized digital repository of your most valued ideas, notes, and creative work synced across all your devices and platforms, a Second Brain gives you the confidence to tackle your most important projects and ambitious goals. Discover the full potential of your ideas and translate what you know into more powerful, more meaningful improvements in your work and life by Building a Second Brain. Ever feel like you aren't Enough? Overwhelmed by too many demands? Concerned about over-consumption and the climate crisis? You're not alone. The Art of Enough is the challenge of our age. In a world full of pressure to be more, do more and consume more, this practical guidebook will help you find your own version of Enough. Enough is a springboard for self-belief, a healthy work pace and sustainable living, so you can move from striving to thriving. Weaving together ideas, stories and practices, The Art of Enough offers seven ways to ease away from the pull of scarcity and excess,

towards flourishing with Enough; finding the balance and boundaries we all need for ourselves and for our world. Becky Hall is a coach, facilitator and speaker and has worked for over 20 years with teams, organizations and leaders, helping busy people all over the world create their own Art of Enough. Filled with practical tools and techniques, The Art of Enough offers seven ways to free yourself to flourish in your life, your work and our world with abundance, flow and clarity. The Art of Enough invites us to find the balance we all need for ourselves and our world. Has politics reached breaking point? Rather than defending liberalism or abandoning it, how can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. Karl Polanyi and the Contemporary Political Crisis is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order. Ben Horowitz, cofounder of Andreessen Horowitz and one of Silicon Valley's most respected and experienced entrepreneurs, offers essential advice on building and running a startup—practical wisdom for managing the toughest problems business school doesn't cover, based on his popular ben's blog. While many people talk about how great it is to start a business, very few are honest about how difficult it is to run one. Ben Horowitz analyzes the problems that confront leaders every day, sharing the insights he's gained developing, managing, selling, buying, investing in, and supervising technology companies. A lifelong rap fanatic, he amplifies business lessons with lyrics from his favorite songs, telling it straight about everything from firing friends to poaching competitors, cultivating and sustaining a CEO mentality to knowing the right time to cash in. Filled with his trademark humor and straight talk, The Hard Thing About Hard Things is invaluable for veteran entrepreneurs as well as those aspiring to their own new ventures, drawing from Horowitz's personal and often humbling experiences. Self-esteem is one of the most elusive goals in the human experience. We are often limited not by what others decide but by what we tell ourselves we can't accomplish. We wouldn't let others treat us so badly, so why do we do it to ourselves? Can this pattern be broken? Absolutely. Identifying negative thoughts and understanding why they aren't reflective of reality builds self-esteem. This easy-to-read workbook guides the reader through a five-step process for overcoming self-doubt and insecurity: 1. Identify specific triggers that make you feel poorly about yourself. 2. Tools for replacing negative with adaptive thinking. 3. Strategies for humanizing your internal critic. 4. A new approach to confronting setbacks. 5. Behavioral exercises that will increase your self-esteem now. Packed with useful insights, straightforward guidance, and compassion, this little gem of a book, in fewer than sixty pages, provides a set of easy tools that will help you feel better about yourself. When people feel better about themselves, everything around them can change for the better. On the other hand, when a person becomes harsh and self-critical they are turning on the one person who can do the most to help. All entrepreneurs start their companies because they think it will give them freedom—freedom to work on their own terms, be their own bosses, and create a company that meets their needs. But so often the opposite happens, and they end up encumbered by businesses that bear little to no resemblance to those they had envisioned. They wind up working for their companies, but their companies don't work for them. Despite the freedom that striking out on your own promises, most of the accepted wisdom on how to build a small business advocates a one-size-fits-all approach. So-called experts—and sometimes just well-meaning friends—urge business owners to grow fast, be more profitable, and imitate other successful start-ups. And while these tips may work for some, they fail to consider the astounding variety of values and motivations that individuals have for starting a business. Too often, owners sacrifice their personal satisfaction in order to conform to unnecessary (and often unworkable) standards. Adelaide Lancaster and Amy Abrams have seen this problem for years when working with women entrepreneurs like themselves. They set out to explore how successful female business owners have grown their enterprises in a way that sustains their own personal goals and needs, not someone else's standards. Drawing on the true stories of nearly 100 entrepreneurs, as well as their own experiences, Abrams and Lancaster guide readers through the best principles that really matter when you work for yourself. For instance: Figure out what's in it for you: Clarify why you started your business and what you want to get out of it over the long haul. Find a role that suits your strengths: Identify where you add the most value and can have the most impact. Embrace experimentation: Trying new things gives you the opportunity to see what works and what doesn't and opens up unseen possibilities. This book empowers entrepreneurs to ignore popular "wisdom" and peer pressure to take charge of their businesses in a way that will help them succeed on their own terms. Vol. for 1876 also includes a report on the sanitary condition of the school houses. "Step-by-step, how-to projects for home rain collection, solar panels, food storage, solar energy systems, eco-friendly improvements, bee keeping, and more"—Provided by publisher. What would it take to have a world where everyone had enough? How can we eliminate poverty, leave enough for non-human nature, and increase wellbeing? This book explores ways the reader can live their life, engage with cultural change, and engage with policy making, to build that world. We are presently on a path to environmental destruction, as our societies are driven by forces which leave many people without what they need to meet their basic needs, while also wasting vast resources on an unsatisfying consumer economy. The current system does not lead to a sense of wellbeing, even among those who are relatively materially comfortable. This book focuses on solutions for building a world of enough. It explains how we can reorient our thinking and take the steps necessary to transform our social systems. It looks at ways to reduce the insatiable desire for status and consumption that drive our economies. It focuses on emerging approaches to economics that take wellbeing as their goal, and explores the policies that are crucial for getting there, such as reducing inequality, investing in public goods, and reducing work time. The book arms the reader with a variety of tools for building a world where everyone has enough for a good life. This guideline defines ventilation and then natural ventilation. It explores the design requirements for natural ventilation in the context of infection control, describing the basic principles of design, construction, operation and maintenance for an effective natural ventilation system to control infection in health-care settings. Vols. 13-62 include abridged annual reports and proceedings of the annual meetings of the American Missionary Association, 1869-1908; v. 38-62 include abridged annual reports of the Society's Executive committee, 1883/84-1907/1908. "Books for New Testament study ... [By] Clyde Weber Votaw" v. 26, p. 271-320; v. 37, p. 289-352. Lee LeFever and his co-founder and wife, Sachi LeFever, didn't know exactly what type of business they were setting out to build when they started Common Craft in the early 2000s. What they were sure of is that they would design the business in such a way that they prioritized their happiness and time—they wanted the opportunity to go camping on Tuesdays if they felt like it, and make up the time later. While not sacrificing their vision for a business that values time over money, Lee and Sachi built a leading internet-based visual communications firm that includes Google, LEGO, Intel, Microsoft, Ford, and Dropbox as its clients. They paved the way for explainer videos that are now a mainstay of companies' marketing and communications strategy. They learned to pivot to different income streams, and say no to opportunities that would increase unhappiness and decrease autonomy. And they did it all while working from home, not taking on outside employees, and camping on Tuesdays. Like Paul Jarvis in Company of One, Lee shows how they did it, and offers his best tips for how you can build a business and a life you love. This book explores new ideas about future real estate, how the trend towards smaller more compact accommodation is taking hold. Tiny homes doesn't just discuss houses, but also other forms of smaller accommodation coming to the fore. It should appeal to those of you who like to get value for money and embrace the new age of less wastage, renewable technologies, and have complete or more control over your investment. By buying this tiny houses book, you can expect to learn: - About tiny house living in general - The history of tiny house movement - Some unique ideas and inspiration when designing and constructing your own tiny house - The key benefits of moving into a, b>tiny house - The things that you have to consider prior to your move to your new tiny house - Practical tips and considerations for laying the foundation and moving into tiny houses - And much much more... Here we are building a small getaway, a living space that has small compact rooms with plenty of flexibility. It is small enough to dust the entire place within ten minutes but big enough for you live there forever. So, there you are! It is the perfect way to a small but lovely house. A #1 New York Times bestseller and Goodreads Choice Awards picture book winner! This is the perfect gift for mothers and daughters, baby showers, and graduation. This gorgeous, lyrical ode to loving who you are, respecting others, and being kind to one another comes from Empire actor and activist Grace Byers and talented newcomer artist Keturah A. Bobo. We are all here for a purpose. We are more than enough. We just need to believe it. Plus don't miss I Believe I Can—the next beautiful picture celebrating self-esteem from Grace Byers and Keturah A. Bobo!
