The Free Sea Mar 22 2020 The freedom of the seas -- meaning both the oceans of the world and coastal waters -- has been among the most contentious issues in international law for the past four hundred years. The most influential argument in favour of freedom of navigation, trade, and fishing was that put forth by the Dutch theorist Hugo Grotius in his 1609 *Mare Liberum*'. The Free Sea' was originally published in order to buttress Dutch claims of access to the lucrative markets of the East Indies. It had been composed as the twelfth chapter of a larger work, *De Jure Praedae*' (On the Law of Prize and Booty'), which Grotius had written to defend the Dutch East India Company's capture in 1603 of a rich Portuguese merchant ship in the Straits of Singapore. This new edition publishes the only translation of Grotius's masterpiece undertaken in his own lifetime -- a work left in manuscript by the English historian and promoter of overseas exploration Richard Hakluyt (1552-1616). This volume also contains William Welwod's critique of Grotius (reprinted for the first time since the seventeenth century) and Grotius's reply to Welwod. Taken together, these documents provide an indispensable introduction to modern ideas of sovereignty and property as they emerged from the early-modern tradition of natural law.

**Automate the Boring Stuff with Python, 2nd Edition** Jun 05 2021 The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to: • Search for text in a file or across multiple files • Create, update, move, and rename files and folders • Search the Web and download online content • Update and format data in Excel spreadsheets of any size • Split, merge, watermark, and encrypt PDFs • Send email responses and text notifications • Fill out online forms Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

**Ghost Letters** Oct 09 2021 In Ghost Letters, one emigrates to America again, and again, and again, though one also never leaves Senegal, the country of one's birth; one grows up in America, and attends university in America, though one also never leaves Senegal, the country of one's birth; one wrestles with one's American blackness in ways not possible in Senegal, though one never leaves Senegal, the country of one's birth; and one sees more deeply into Americanness than any native-born American could. Ghost Letters is a 21st century Notebook of a Return to the Native Land, though it is a notebook of arrival and being in America. It is a major achievement. —Shane McCrae

**The High Cost of Free Parking** Nov 22 2022 One of the American Planning Association's most popular and influential books is finally in paperback, with a new preface from the author on how thinking about parking has changed since this book was first published. In this no-holds-barred treatise, Donald Shoup argues that free parking has contributed to auto dependence, rapid urban sprawl, extravagant energy use, and a host of other problems. Planners mandate free parking to alleviate congestion but end up distorting transportation choices, debasing urban design, damaging the economy, and degrading the environment. Ubiquitous free parking helps explain why our cities sprawl on a scale fit more for cars than for people, and why American motor vehicles now consume one-eighth of the world's total oil production. But it doesn't have to be this way. Shoup proposes new ways for cities to regulate parking – namely, charge fair market prices for curb parking, use the resulting revenue to pay for services in the neighborhoods that generate it, and remove zoning requirements for off-street parking. Such measures, according to the Yale-trained economist and UCLA planning professor, will make parking easier and driving less necessary. Join the swelling ranks of Shoupistas by picking up this book today. You'll never look at a parking spot the same way again.

*When the Rivers Run Dry* Sep 27 2020 In this groundbreaking book, veteran science correspondent Fred Pearce travels to more than thirty countries to examine the current state of crucial water sources. Deftly weaving together the complicated scientific, economic, and historic dimensions of the world water crisis, he provides our most complete portrait yet of this growing danger and its ramifications for us all. "A strong-and scary-case that a worldwide water shortage is the most fearful looming environmental crisis. With a drumbeat of facts both horrific (thousands of wells in India and Bangladesh are poisoned by fluoride and arsenic) and fascinating (it takes 20 tons of water to make one pound of coffee), the former New Scientist news editor documents a "kind of cataclysm" already affecting many of the world's great rivers." - Publishers Weekly, starred review "Oil we can replace. Water we can't-which is why this book is both so ominous and so important." -Bill McKibben, author of The End of Nature
